MUSIC

staff with notes—whole note, half note, quarter, eighth, sixteenth, thirty-second; a dot after a note adds to it half the length of the note without the dot; to extend the compass of the staff, *ledger lines* are added above or below

breve; double whole note

rests—whole, half, quarter, eighth, etc.

brace—used to connect two or more staves indicating that the parts on these staves are to be performed simultaneously

bar—a vertical line across the staff, dividing it into equal measures of time; a double bar marks the end of a division, movement, or composition, while a single heavy bar is used (as in a hymn tune) to mark the end of a verse or period

G clef; treble clef—used to indicate that the second line represents the first G above middle C

F clef; bass clef—used to indicate that the fourth line represents the first F below middle C

C clefs—used to indicate that any line or space on which they are placed represents middle C

sharp
flat

natural—used to annul the effect of a previous ♯ or ♭; the sharps or flats placed at the beginning of a composition or section are called collectively the *key signature*

× or ※ double sharp—used to raise a note two half steps

bb double flat—used to lower a note two half steps

♯ single sharp—used after a double sharp

♭ single flat—used after a double flat

repeat—used to indicate the beginning and end respectively of a passage to be played or sung twice

segno; sign—used to mark the beginning or end of a passage to be repeated

presa—used to indicate where successive voice parts take up the theme

common time $\frac{4}{4}$

alla breve—used to indicate $\frac{4}{2}$ or $\frac{2}{2}$ time

long appoggiatura—used as an embellishing note a degree above or below the principal note

acciacatura; short appoggiatura—used to indicate that the note is to be performed very quickly

turn—a grace consisting of four tones: 1) the one above the principal tone; 2) the principal tone; 3) the one below the principal tone; 4) the principal tone

inverted turn—a grace of four tones like the turn but beginning with the tone below instead of the tone above

mordent

trill; shake

arpeggio

8va all'ottava; at the octave—used above the staff to indicate that the tone or tones are to be sounded an octave higher than written; used below the staff to indicate that they are to be an octave lower

fermata; hold—used over or under a note; when placed over a double bar denotes the conclusion of the piece

crescendo

decrescendo; diminuendo

swell

accent marks—used to indicate that a tone or chord is to be given additional stress

tenuto mark—used to indicate that a note is to be held to its full value

staccato—placed over or under a note

slur; tie

tract or add. The world will little note, nor long remember, what we say here, but it can never forget what we did here. It is for us, the living, rather, to be dedicated here to the great task remaining before us,—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we now highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people, shall never perish from the earth.

"Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle-field of that war. We have come to dedicate a portion of that field, as a final resting place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us,—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people, shall not perish from the earth."

BIOGRAPHICAL NAMES

OVER FIVE THOUSAND NAMES WITH PRONUNCIATIONS

The aim of this section is to give dates, nationality, and status or occupation of the persons included and to indicate the syllabification and pronunciation of such part of their names as they are most often known by. Such boldface items as roman numerals, connectives (as *von* and *de*), and place names (as in *Alexander of Tunis*) are usually not pronounced. Other name elements (as prenames and titles) are pronounced sparingly. A large proportion of the pronunciations shown for names in languages other than English are anglicized to some extent (see the section on foreign names in "Guide to Pronunciation").

Names containing connectives like *d'*, *de*, *di*, *van*, or *von* are alphabetized usually under the part of the name following the connective; exceptions are chiefly American or British names.

Dates of birth and death follow the name. A doubtful or approximate date is indicated by a question mark; in some instances only the years of principal activity are given, preceded by the abbreviation *f* (flourished). The dates of a reign or other term of office are also given in parentheses.

Most of the abbreviations used will be found in the list on page 22a; for others consult the longer list of Abbreviations on pages 1042 ff.

FORMS OF ADDRESS

An exhaustive list of all alternative forms of address permissible in polite correspondence would extend far beyond the scope of this dictionary; especially in informal correspondence there is a great variety of possible salutations. In the table below we have usually put the most formal address and salutation first. Differences of local usage, however, inevitably introduce many exceptions. In the United States "My dear Mrs. Smith" is more formal than "Dear Mrs. Smith"; in Great Britain the reverse is true. In business correspondence the addressee's address is placed before the salutation; in most official and some social correspondence, it is placed at the foot of the letter, below and to the left of the signature. Social invitations to a married man are customarily addressed to the man and his wife; as, Senator and Mrs. —; The President and Mrs. —; Lord and Lady —; Their Excellencies, the German Ambassador and Madam —; etc.

Traditional masculine forms are used throughout for offices that are now sometimes held by women. Substitution of *Madam* for *Sir*, *Mrs.* for *Mr.*, *Her* for *His*, etc., (as at *ambassador*, *cabinet officer*, *professor*, *senator*) is always appropriate.

It will be noted that some of the addresses

given below begin with the word "To", whereas most do not. There is no hard-and-fast rule. We have tried to suggest merely the more customary usage. Insertion or omission of the word "To" is optional. It will also be noted that the same word may be spelled differently according to the residence of the persons addressed. For example, in the United States the spellings *honor* and *honorable* are preferred; but in Great Britain, *honour* and *honourable*. In the address abbreviations are commonly used but they should never be used in the salutation or beginning of a letter.

*Such salutations as My Lord, Your Lordship, etc., are not ordinarily used in the United States of America, but should be used by an American writing to dignitaries of foreign countries entitled to such a title or mark of respect.

†When the person addressed holds several titles, as one from birth, another by marriage, and another by profession, the highest title should be preferred.

‡Clerical, naval, and military prefixes are written before other titles; initials indicative of distinction are written after the title and name; an officer is addressed by his official title when the communication refers to official business.

SPELLING

1.1 Words ending in -x are unchanged before any suffix: *coax*→*coaxed*, *coaxing*; *fix*→*fixable*, *fixer*; *six*→*sixty*.

1.2 Words ending in -c remain unchanged before *a*, *o*, *u* or a consonant: *frolic*→*frolicsome*; *sac*→*saclike*; *zinc*→*zincate*, *zincoid*, *zincous*; but before suffixal *e*, *i*, and *y* usually add *k* if the pronunciation of the *c* remains hard but add nothing if the pronunciation of the *c* becomes soft: *critic*→*criticism*, *criticize*; *frolic*→*frolicked*, *frolicking*; *music*→*musician*; *physic*→*physicist*; *toxic*→*toxicity*.

1.3 Words ending in consonant plus -c usually remain unchanged before any suffix, but forms with an inserted *k* occur occasionally: *arc*→*arced*/sometimes *arcked*, *arcing*/sometimes *arcking*; *disc*→*disced*, *discing*; *zinc*→*zincing*/*zincking*, *zincite*; *talc*→*talcky*.

1.4.1 Words ending in a single consonant except x or c immediately preceded by two or more vowels in the same syllable remain unchanged before any suffix: *air*→*aired*, *airing*, *airy*; *appeal*→*appealed*, *appalling*; *brief*→*briefed*, *briefly*; *cloud*→*clouded*, *cloudless*; *cool*→*cooled*, *cooler*, *coolest*, *cooling*, *coolly*; *suit*→*suitable*, *suitor*.

EXCEPTION: *wool*→*wooly*/but *woolly* is more frequent.

1.4.2 Words ending in a single consonant immediately preceded by a single vowel bearing primary stress double the consonant before a suffixal vowel but not before a suffixal consonant: *abet*→*abetted*, *abetting*, *abettor*; *bag*→*baggage*; *begin*→*beginner*; *clan*→*clannish*; *drop*→*droplet*, *dropped*; *fit*→*fitness*, *fitting*; *glad*→*gladden*, *gladly*.

EXCEPTIONS: *chagrin*→*chagrined*, *chagrining*; *combat*→*combated*, *combating*; *control*→*controlled*, *controlling*; *prefer*→*preferable*, *preference*; *gas*→*gaseous*, *gasify* but *gassed*, *gassing*.

1.4.3 Words ending in a single consonant immediately preceded by a single vowel bearing secondary stress vary greatly in their derivatives: (1) some always double the consonant: *handicap*→*handicapped*, *handicapping*; *humbag*→*humbagged*, *humbagging*; (2) some have single consonant only: *catalog*→*cataloged*, *cataloging*; *chaperon*→*chaperoned*, *chaperoning*; *parallel*→*paralleled*, *paralleling*; (3) some have both forms: *benefit*→*benefited*/*benefitted*, *benefiting*/*benefitting*; *kidnap*→*kidnapped*/*kidnaped*, *kidnapping*/*kidnaping*; *program*→*programmed*/*programed*, *programming*/*programing*.

1.4.4 Words ending in a single consonant immediately preceded by one or more vowels without stress remain unchanged before any suffix: *bargain*→*bargained*, *bargaining*; *credit*→*credited*, *crediting*, *creditor*; *gallop*→*galloped*, *galloping*; *solid*→*solider*, *solidest*, *solidify*, *solidly*.

EXCEPTIONS: (1) a large group of words doubles a final consonant immediately preceded by a single unstressed vowel before a suffixal vowel; in British use this is the regular practice; in U.S. use it is usually an accepted alternative to the one-consonant spelling: *apparel*, *bevel*, *bias*, *cancel*, *chisel*, *counsel*, *cudgel*, *dial*, *duel*, *equal*, *focus*, *fuel*, *label*, *libel*, *model*, *panel*, *quarrel*, *rival*, *signal*, *snivel*, *spiral*, *stencil*, *symbol*, *total*, *travel*; (2) two *l*'s are more common in adjectives like *gravelly*, *tinselly* than in derivatives with other suffixes; (3) for derivatives of *worship* the one-*p* and two-*p* forms are about equally common.

1.5 Words ending in a single consonant that is silent remain unchanged before any suffix: *chamois*→*chamoised*, *chamoising*; *hurrah*→*hurrahed*, *hurrahing*.

EXCEPTION: *ricochet*→*ricocheted*/*ricochetted*.

1.6 Words ending in two or more consonants the last of which is not c remain unchanged before any suffix: *art*→*artistic*, *artless*; *attach*→*attached*, *attachment*; *buzz*→*buzzed*, *buzzer*, *buzzing*; *condemn*→*condemnatory*, *condemned*, *condemning*; *length*→*lengthen*, *lengthy*; *odd*→*oddy*, *oddlly*.

EXCEPTIONS: (1) words ending in *-ll* often drop one *l*: *dull*→*dulness*; *fill*→*fulfil*; *roll*→*enroll*; *skill*→*skilful*; *thrall*→*enthrall*, *thraldom*; (2) the second *l* of final *-ll* frequently disappears before suffixal *l*; it always disappears before *-ly* (*droll*→*drolly*; *dull*→*dully*; *full*→*fully*); before *-less* it may disappear, but hyphenated forms retaining all three *l*'s are more frequent (*hull-less*); with *-like* the hyphenated form retaining all three *l*'s is usual (*bell-like*, *scroll-like*).

1.7 Words ending in silent -e drop the vowel before a suffixal vowel but remain unchanged before a suffixal consonant: *bone*→*boned*, *boning*, but *boneless*; *curve*→*curvature*, *curved*, *curving*, but *curvesome*; *imagine*→*imaginable*, *imagining*, but *imagines*.

EXCEPTIONS: (1) proper names ending in single *-e* preceded by one or more consonants usually keep the *e* before the suffix *-an*; in the derivatives so formed the *e* is sounded, whether or not it is silent in the base: *Europe*→*European*; *Shakespeare*→*Shakespearean* usually preferred to */Shakespearean*; (2) *mile*→*mileage* much more frequent than */mileage*; *nurse*→*nursling*; (3) before the suffix *-ly* words ending in consonantal *-le* usually drop the *-le*: *gentle*→*gently*; *subtle*→*subtly*/but also *subtly*; (4) some words ending in *-re* retain the *-e* before a suffixal vowel: *acre*→*acreage*; (5) words ending in *-ce* or *-ge* usually retain the *-e* before any suffixal letter except *e*, *i*, or *y*, thus preserving the softness of the *c* or *g*: *change*→*changeable*, *changeless* (but *changing*); *courage*→*courageous*, *encouragement* (but *encouraged*, *encouraging*); *grace*→*graceful* (but *disgraced*, *disgracing*); *peace*→*peaceable*; *range*→*rangy*/but also *rangey*. A *d* preceding *g*

may in a few cases act as a preserver of the soft sound and permit the dropping of the *-e*: *abridge*→*abridgment*/but *abridgement* especially in Britain; *judge*→*judgment*/but *judgement* especially in Britain; (6) although final *-e* regularly drops before the suffix *-able*, some adjectives in *-able* have alternatives retaining the *-e*: *like*→*likable/likeable*; *love*→*lovable/loveable*; *size*→*sizable/sizeable*; (7) usage fluctuates considerably with regard to dropping or retaining final *-e* before derivatives formed with the suffix *-y*; many have both the *-ey* and the *-y* alternative: *home*→*homey/homy*; *horse*→*horsey/horsy*; *mouse*→*mousy/mousey*; *stone*→*stoney/stony*; and some words have only one form in common usage: *rose*→*rosy*; *shade*→*shady*; (8) the silent *-e* remains in some present participles to distinguish them from the corresponding forms of other verbs: *dye*→*dyeing* (in contrast to *dying*); *singe*→*singeing* (in contrast to *singing*).

1.8 Words ending in *-e* preceded by a vowel drop the final *-e* before suffixal *-a-* and *-e-*: *argue*→*arguable*, *argued*; *awe*→*awed*; *blue*→*blued*, *bluer*, *bluest*; *lie*→*liar*.

EXCEPTIONS: (1) words ending in *-ee* usually retain both *e*'s before *a* and always before suffixal *-i-*: *agree*→*agreeable*, *agreeing*; (2) *-ie* in an accented syllable becomes *-y* before suffixal *-i-*: *die*→*dying*; (3) *-ie* in an unaccented syllable remains unchanged before suffixal *-i-*: *stymie*→*stymieing*; (4) *-oe* remains unchanged before suffixal *-i-*: *canoe*→*canoeing*; *hoe*→*hoeing*; (5) *-ue* usually drops *-e* before suffixal *-i-*: *argue*→*arguing*; *true*→*truism*/but *trueing/truing*; (6) *-ye* alternatively keeps or drops *-e* before suffixal *-i-*: *eye*→*eyeing/eying*; (7) adjectives with the suffix *-y* retain *-e*: *glue*→*gluey*; *tissue*→*tissuey*; (8) the double vowel usually remains unchanged before a suffixal consonant: *agree*→*agreement*; *blue*→*blueness*; *woe*→*woeful* but also *woful*; but: *argue*→*argument*; *awe*→*awful* (but *awesome*); *true*→*truly*.

1.9 Verbs derived from the French and ending in *-é* usually form their past and past participle in *-éd*, less often in *-eed*; they form their present participle in *-éing*: *appliqué*→*appliquéd*, *appliquéing*; *visé*→*viséd*/also *viséed*.

1.10 Words ending in *-y* preceded by a consonant usually change the *-y* to *i* before any suffixal letter except *i* and the possessive sign 's: *beauty*→*beautiful*, *beautify*; *body*→*bodily*, *embodiment*; *contrary*→*contrariwise*; *copy*→*copyist*; *defy*→*defiant*, *defying*; *fancy*→*fanciful*, *fancying*; *happy*→*happiness*; *likely*→*likelihood*; *mercy*→*merciless*; *thirty*→*thirtyish*; but: *everybody*→*everybody's*; *Mary*→*Mary's*.

EXCEPTIONS: (1) one-syllable words usually retain *-y* before *-ly* and *-ness*: *dry*→*dryly*, *dryness*; (2) comparatives and superlatives of one-syllable adjectives alternatively retain *-y* or replace it with *i*: *dry*→*drier*, *driest*/more common than *dryer*, *dryest*; (3) *fly*→*flyer/flyer*; (4) *-y* remains unchanged before *-like* and *-ship*: *lady*→*ladylike*; in derivatives of *baby* and *lady*: *baby*→*babyhood*; *lady*→*ladykin*; (5) *-y* may be lost completely before suffixal *-i-*, especially when separated by one or more syllables from the primary stress of the base word: *accompany*→*accompanist*; *military*→*militarism*, *militarist*, *militarize*.

1.11 Words ending in *-y* preceded by a vowel usually remain unchanged before any

suffix: *alloy*→*alloys*; *attorney*→*attorneys*; *enjoy*→*enjoying*, *enjoyment*; *play*→*played*, *playing*, *player*, *playful*, *playlet*.

EXCEPTIONS: (1) *day*→*daily*; *lay*→*laid*; *say*→*saith*; *slay*→*slain*; (2) *gay*→*gaiety/gayety*, *gaily/gayly*; *stay*→*stayed*; (3) comparatives and superlatives of adjectives ending in *-cy* replace these two letters with *i*: *gluey*→*gluier*, *gluiest*, *gluily*; *phony*→*phonier*, *phoniest*, *phonily*; (4) adjectives ending in *-wy* change the *-y* to *i* before any suffix: *dewy*→*dewier*, *dewiest*, *dewily*, *dewiness*; *showy*→*showier*, *showiest*, *showily*; *showiness*.

1.12 Words ending in a vowel except *e* or *y*, when adding a suffix beginning with a consonant, remain unchanged: *China*→*Chinaman*; *radio*→*radiogram*.

1.13.1 Verbs ending in a vowel except *e* or *y*, when adding a suffix beginning with a vowel, remain unchanged before their inflectional suffixes: *alibi*→*alibied*, *alibing*; *boo*→*boosed*; *radio*→*radioed*, *radioing*; *ski*→*skied*, *skiing*, *skier*.

EXCEPTIONS: verbs ending in single *-o* usually insert *e* before adding *-s* for the third person singular: *echo*→*echoes*; *lasso*→*lassoes*.

1.13.2 Nouns ending in a vowel when adding one of the suffixes *-esque*, *-ism*, *-ist* usually remain unchanged especially if the base word is short and the final vowel is essential to its recognition: *solo*→*soloist*; *Tito*→*Titoism*; *Zola*→*Zolaesque*.

EXCEPTIONS: *cello*→*cellist*; *Nazi*→*Nazism*/but also *Naziism*; *propaganda*→*propagandist*.

1.13.3 Geographical and personal names ending in *-a* regularly drop the *-a* before the suffix *-an/-ian*: *America*→*American*; *Canada*→*Canadian*; *Victoria*→*Victorian*.

1.13.4 Some geographical names ending in *-o* drop the *-o* before *-an/-ian*: *Mexico*→*Mexican*; *Ontario*→*Ontarian*; *San Diego*→*San Diegan*.

1.13.5 Scientific terms of Greek or Latin origin ending in *-a* regularly drop the *-a* before a suffix beginning with a vowel: *pleura*→*pleural*; *urea*→*urease*, *ureic*.

1.13.6 Words ending in *-o* insert *e* before suffixal *-y*: *goo*→*goocy*; *mosquito*→*mosquitoey*.

1.13.7 Geographical and personal names ending in *-o* or a combination of vowels pronounced ʌ often insert *n* or *v* before *-an/-ian*: *Buffalo*→*Buffalonian*; *Marlow*→*Marlovian*; *Thoreau*→*Thoreauvian*; but some geographical names ending in *-o* remain unchanged before *-an*: *Chicago*→*Chicagoan*.

1.14 When adding a prefix that forms a new word, a base word usually remains unchanged: *act*→*enact*; *call*→*recall*; *change*→*exchange*; *prove*→*disprove*; *veil*→*unveil*.

EXCEPTIONS: words ending in *-ll* often drop one *l* when adding a prefix; this practice, common in Britain, is widespread also in the U.S., but the unchanged (*-ll*) forms prevail in this country: *fill*→*fulfil*, *fulfilment*; *roll*→*enrol*. By analogy even some infinitives which are not derivatives of English base words sometimes drop one *l*. For these words, too, the one *-l* spelling prevails in

Britain, whereas in the U.S. it exists side by side with the *-ll* form: *distil/distill; instal/install*.

1.15 Two or more words joining to form a compound usually retain the full spelling of both component words: *billfold, makeup, sidestep, widesread*.

EXCEPTIONS: many compounds which are long-established in the language and in which the full literal force of one or both elements has been weakened or lost have dropped a letter from one, sometimes both, of the original elements: *almost, alone, already, always; wherewithal; welcome, welfare; artful, hateful; fulfill; pastime; until; wherever*.

2.1 -able/-ible. English has a large group of adjectives in *-able*, another in *-ible*; the force of the suffix in both groups is the same. Many of these adjectives are from Latin adjectives in *-abilis* and *-ibilis*; *-abilis* occurs after first-conjugation stems, *-ibilis* after stems of the other conjugations. With *-abilis* the stem used is the present, with *-ibilis* it is sometimes the present, sometimes the participial. Examples: (first conjugation) *laudabilis*; (second, third, fourth conjugations respectively, present stem) *horribilis, credibilis, audibilis*; (second, third, fourth conjugations respectively, participial stem) *risibilis, defensibilis, sensibilis*. These and many other such Latin adjectives have been borrowed by English, with change of *-ilis* to *-le*. In addition, many others have been analogically formed in English, or in French and borrowed by English. Since Latin provides precedent for either the present or the participial stem with *-ibilis*, two quite or substantially synonymous *-ible* words with different stems have in some cases been introduced into English (*corrodible/corrosible, submergible/submersible*). Further, *-able* has become a productive suffix in English and has been attached to a multitude of English verbs. Many of these that are Latin-derived are (a) from second-, third-, and fourth-conjugation stems, or (b) from first-conjugation participial stems, with none of which *-abilis* occurs. Hence, English has a few variants of the type *preventible/preventable* (class a) and a probably larger number of the type *educable/educatable* (class b).

2.2 e/ae, o/oe. The digraphs *ae/æ* and *oe/ø* of Latin and of Greek transliterated into Latin are sometimes retained in English derivatives and borrowings, sometimes reduced to *e*. Sometimes one form strongly prevails throughout English, and variants are infrequent: *economy, enigma, estuary, ether, aer-* words (as *aerial, aeronautics*). When variants are frequent, the one-letter variant is nearly always in greater favor in U.S. use than in British: *anemia/anaemia; anesthetic/anaesthetic; diarrhea/diarrhoea; esophagus/oesophagus; fetus/foetus; hemoglobin/haemoglobin*.

2.3 -ant/-ent. English contains a large group of words ending in *-ant* and another in *-ent*, both pronounced /ænt/. Most of the *-ant* words stem from Latin present participles of the first conjugation (*radiant*, from Latin *radians, -antis*), the *-ent* words from Latin present participles of the other conjugations (*regent*, from Latin *regens, -entis*); but not always (*tenant*, ultimately from a Latin verb of the second conjugation, owes its *a* to Old French). The two endings do not differ in force, and, though usually all English words that derive from the present participle of the same Latin verb have *a* only or *e* only, in some

families of such derivatives there is variation: *pendant* noun, *pendency, dependent* adj., *independent, dependent* also *dependant* noun; *propellant, expellant, repellent, impellent*.

2.4 -ction/-xion. Most nouns ending in /kʃən/ are spelled *-ction* only; a few are alternatively *-ction/-xion*; a few are *-xion* only. Those that are *-ction* only are ultimately from a Latin verb whose participial stem ends in *-ct*: *direction*, from *directio* from *direct(us)*. Those that are alternatively *-ction/-xion* are ultimately from a Latin verb whose participial stem ends in *-x* and whose present stem ends in *-ct*; the participial stem is the source of the *-xion* variant, the present stem is the source, usually via an English verb, of the *-ction* variant: thus *inflexion* is from *inflexio* from *inflex(us)*; *inflexion* is *inflexion* with *x* assimilated to the *ct* of English *infect*, from *infect(ere)*, an assimilation catalyzed by the analogy of nouns like *direction*. Nouns that are *-xion* only are ultimately from Latin verbs of which the present stem does not end in *-ct* and which accordingly have not procreated English verbs in *-ct* (*crucifixion, transfixion, and fluxion*): *deflection* U.S., *deflexion* Brit.; *inflexion* U.S., *inflexion* Brit.; *connection* U.S., *connexion* Brit.

2.5.1 em-/im-, en-/in-. The Latin preposition or adverb *in*, in such English derivatives as *inoculate, intrude, invent*, occurs as a prefix in many Latin verbs and verb derivatives. Sometimes the *in-* is unchanged (*inoculare, intrudere, inventire*). At other times the phonetic influence of an initial consonant of the base that follows the *in-* changes the *n* to a consonant having the same articulation as the base-initial consonant. The change is to *m* before *m, b, and p* (*immigrare, imbibere, implorare*), to *l* before *l* (*illuminare*), to *r* before *r* (*irradiare*).

2.5.2 French — Old and Modern — has borrowed many of these compounds and retained the Latin spelling of the prefix (*inoculer, inventer, immigrer, imbibere, implorer, illuminer, irradiere*). However, Latin *in* became *en* in French, and when similar compounds were constructed in French on French words as the base the vowel used in the prefix was *e*. The assimilation of the *n* to *m* before *m, b, and p* continued (*em-mencer, embaumer, employer*); the assimilation of the *n* to *l* and *r* before *l* and *r* respectively did not (*enlargier, engrager*).

2.5.3 English, like French, has borrowed many of the Latin compound verbs and retained the Latin spelling of the prefix (*inoculate, invent, immigrate, imbibe, implore, illuminate, irradiate*). English has borrowed also from French many forms in *em-* and *en-* (*embalm, employ, enlarge*). English has taken over also the prefixes *im-, in-, em-, en-* and attached them to English nouns and adjectives to make verbs, or to verbs to make other verbs (*imbed, encage, enkindle*). As in French formations, *-m* is usually used before *m, b, p* (*immarble/emmarble, imbed/embed, impanel/empanel*) but in the compound having *mesh* as base both *m* and *n* are found prefixally.

2.5.4 Of the borrowings from French *em-* and *en-* forms, and of the formations within English, some have now *e* now *i* as the prefixal vowel (*enclose/inclose, embed/imbed, embitter/imbitter*); others, some of which formerly showed the same variation, are found with *e* only or with *i* only (*embalm, encamp, impeach*). *i* is more frequent before *m* than before *n*.

2.5.5 In most of the intra-English formations the prefix adds little or nothing semantically to the base. Before an adjective or noun it serves chiefly as a sign that the adjective or noun has been made a verb. This verb-forming prefix is closest to being completely functionless when it is added to a verb: thus *kindle* and *enkindle* are not easily discriminable. If the prefix makes a substantial semantic contribution, usually the prefixal vowel is *i* and the prefixal consonant is *n* whatever letter follows (*inborn*, *inbound*, *inbred*/but *imbred* occasionally).

2.6 -er/-re. Some English words, mostly derived from French words in *-re*, which in turn are mostly derived from Greek or Latin, alternatively end in *-er/-re*. But the *-er*, of different origin, that is a productive suffix freely attachable to English bases (*writer*, *header*, *four-poster*, *New Yorker*) does not have the variant *-re*. Most of the variants are usually *-er* in U.S., *-re* in Britain: *caliber/calibre*; *center/centre*; *somber/sombre*.

EXCEPTIONS: (1) in both U.S. and British use *-re* is usually the form after *c*, the immediately following *r* ensuring the hardness of the *c* (*acre*, *chance*, *involute*, *lucre*, *massacre*, *mediocre*, *naere*, *wisecacre*). But after *g* (which, like *c*, may be hard or soft) the same is not true (U.S. *meager*/British *meagre*; but both countries prefer *eager*, *ogre*); (2) U.S. and British usage both prefer *cadre* \k'ad-rē\, *macabre*, *timbre* "tone quality". The latter (often \t'am-bər\) is not to be confused with *timber* "wood" (\t'im-bər\), a different word, which has only *-er* in both countries; (3) although *meter*/*metre*, the metric=system unit of measurement (which is ultimately from Greek *metron*), and its compounds (*centi-met-*, *decimet-*, *millimet-*) are *-re* in Britain, *meter* (which is *mete* + *-er*) is universal in both countries for any device for measuring (electric *meter*), as is also *-meter* as the second element of many names for specific measuring devices (*altimeter*, *barometer*, *galvanometer*, *gasometer*, *ohmmeter*, *speedometer*, *thermometer*, *voltmeter*, *volumeter*). Some of these compounds are simply a joining or telescoping of an English first element and *meter* "measuring device", but most are not. In a few the quality of the *e* that follows the *m* is the same as in the simplex word; in most this *e* is of a different quality and without stress. In metric-system names the sound values in *-meter/-metre* are the same as in the simplex; (4) although *meter*/*metre* "rhythm" is *metre* in Britain, for names of individual measures (*trimeter*, *tetrameter*, *pentameter*, *hexameter*) *-meter* is the spelling there as well as in the U.S. In these, too, the *e* following the *m* is without stress; (5) both *theater*/*theatre* have wide currency in the U.S., only the second in Britain. In New York City, the theatrical center of the U.S., the spelling is usually *theatre*; (6) *neuter* and *sober* are in both countries *-er* only.

2.7.1 -er/-or. These are the most common endings in English for agent nouns. This *-or* does not have a variant *-our* except in *saviour*. A few agent nouns have a rather than *e* or *o* before the *r* (*beggar*, *liar*, *pedlar* sometimes). Such nouns of this class as are based on a Latin perfect stem, whether the nouns are formed in English from an English verb so based or are taken from the Latin or, with somewhat altered spelling, from French (*author*) usually have *-or*: *actor*, *collector*, *conductor*, *confessor*, *inspector*, *operator*, *super-visor*, *translator*.

2.7.2 Other agent nouns usually have *-er*, such as nouns based on Latin present stems and nouns based on verbs of Germanic origin: *designer*, *digger*, *distiller*, *invader*, *producer*, *subscriber*, *voyager*.

2.7.3 Occasionally, however, an English agent noun, although its base is from a Latin perfect stem, has *-er* for suffix, as a less frequent variant of *-or*. In such pairs the *-or* form is on the analogy of Latin, the *-er* form is the English suffix added to an English verb that is from the same Latin perfect stem as the *-or* noun (*executor*/archaic *executer*). Conversely, sometimes an agent noun, though its base is from a Latin present stem, has *-or* alone or as a variant of *-er*. Sometimes false analogy may be responsible: some Latin present stems have the same final consonant or consonant cluster as some Latin perfect stems (compare the present participle *reflect[er]* and the past participle *elect[us]*); the coin of *reflector* may have used as his model a quite regular formation of the type *elector*. So also *adaptor* and *advisor* are unexpected (compare *adapt[are]*, *advise[are]*), *captor* and *supervisor* are regular (compare *capt[us]*, *supervis[us]*).

2.7.4 Old French is the source of numerous *-or* agent nouns. Many are law terms or have a legal sense, and of these many have correlatives in *-ee* (*bailor*, *bailee*). Most of the terms have variants in *-er*, and *-er* is the usual spelling in nonlegal use of such terms as have both legal and nonlegal senses: *ubettor*, *bailor*, *consignor*, *mort-gagor*, *vendor*.

2.8 -ph-/-f-. \səl-fər\ as a chemical term and chemical terms based on it are usually spelled *sulf-* by U.S. scientists, *sulph-* by British scientists. Nonscientists in both countries usually spell *sulph-*.

2.9 -ize/-ise. Ancient Greek has a verb suffix *-izein*, which descended into postclassical Latin as *-izare* and into French as *-iser*. English has borrowed verbs (all of more than one syllable) containing this suffix from all three languages (*ostracize*, *pulverize*, *moralize*). In addition, English has isolated the suffix and used it quite freely, attaching it to bases both Greek (*criticize*, *mechanize*) and non-Greek (to Latin bases, *anglicize*; to English nouns, *victimize*, *memorize*; to English adjectives, *normalize*, *victorianize*; to proper names, *londonize*, *bowlerize*). In U.S. use the suffix is nearly always spelled *-ize*, even in words from French, in which the spelling is *-iser*. In Britain, however, many not only retain *s* in borrowings from French but use *s* instead of *z* in borrowings from Greek and Latin and in English formations. Many others in Britain, however, including several influential publications, use *-ize* in all words in which \iz\ is descended from Greek *-izein*.

EXCEPTIONS: (1) although \iz\ in *exorci-e* and *chasti-e* derives (in the second somewhat circuitously) from Greek *-izein*, there is a strong preference for *s* over *z* in these words; (2) the ending \iz\ in some English verbs (and a few nouns) not only is from etyma spelled with *s* rather than *z* but has no etymological relationship to the ending discussed in the preceding paragraph. For *adverti-e s* strongly prevails in both the U.S. and Britain. In Britain *s* seems to prevail in *amorti-e*, *assi-e*, *recogni-e*, strongly prevails in *aggrandi-e*, *capsi-e*, *cogni-e*, *gormandi-e*; in the U.S. *z* alone occurs

or strongly prevails in all seven words. The verb *merchandise* occasionally has *z*, the noun seldom. The following are usually found with *s*: *advise*, *comprise*, *compromise*, *demise*, *despise*, *devise*, *disguise*, *enterprise*, *excise*, *franchise*, *improvise*, *revise*, *supervise*, *surmise*, *surprise*; (3) in the small group of words *analyse*, *dialyse*, *electrolyse*, *paralyse*, in which *-lyse* derives from the Greek noun *lysis*, *s* seems to be somewhat more common than *z* in Britain but *z* is much more common than *s* in the U.S.

2.10 -ol/-oul. In the words *mold/mould*, *molder/moulder*, *molt/moult*, and *smolder/smoulder*, the *u* is likely to be more often dropped than kept in the U.S., is almost always kept in Britain. *Molten* (from *melt*) has no variant with *u*.

2.11 -or/-our. English contains a group of *r*-final nouns that are descended from Latin nouns having nominative *-or*, that are not agent nouns (compare 2.7.1), and that are usually spelled *-our* in the U.S. but *-or* in Britain: *ardor/ardour*; *color/colour*; *fervor/fervour*; *honor/honour*; *labor/labour*; *rigor/rigour*; *tumor/tumour*. The first such borrowings into English were from early Old French, and the termination in both lending and borrowing language was *-or* or *-ur*. In French as spoken in Britain after the Norman Conquest the ending became *-our*. English borrowings from this Anglo-French retained the *-our*, and earlier borrowings from continental French became *-our* by assimilation. After the Renaissance made Latin more widely known, words of this category were usually borrowed, in their Latin spelling, with *-or* as the ending. Many words once spelled *-our* in English are in Britain now written *-or*, but others are not. In the U.S. the *-our* spelling is seldom used in these words.

EXCEPTIONS: (1) although the *-our* ending formerly occurred also in agent nouns, *saviour* is the only important survival; (2) *glamour* and *saviour* are the only two *-our* forms that have wide currency in the U.S.; (3) not all *-or/-our* words derive ultimately from Latin *-or* words (*arbor* "lattice-work", *armor*, *behavior*, *harbor*, *neighbor*). In Britain, *u* is usually retained before suffixes that had their origin within English (*favourer*, *flavourful*, *humourless*, *neighbourhood*, *neighbourly*, *vapourish*); before Latin suffixes that are not freely addable to English words *u* usually disappears (*coloration*, *honorary*, *honorific*, *odoriferous*, *odorous*); before Greek and Latin suffixes that have been naturalized (*-able*, *-ism*, *-ist*, *-ite*, *-ize*) the spelling varies.

2.12 -ped/-pede (from Latin *pes*, *pedis*, foot). *-pede* is more common than *-ped* after *milli-* and possibly the only form after *veloci-* and *centi-*. After other elements *-ped* is usual and is probably the only form that is now used after *bi-* and *quadru-*.

2.13 -c/-s: *defence/defense*; *offence/offense*; *pretence/pretense*; *vice/visé* "tool". In all four words *c* is the preference in Britain, *s* in the U.S.; *defensive*, *offensive*, and *pretension*, however, are the usual word forms in both countries; *licence/license*; *practice/practise*: U.S. usually spells *license* both noun and verb with *s*; Britain almost invariably spells the noun with *c*, usually spells the verb with *s*. U.S. uses *c* more often than *s* in the noun *practice*, uses one letter about as often as the other in the verb *practise*; Britain strongly prefers *c* in the noun (*s* seems nonexistent), *s* in the verb. Although noun and verb were once undifferentiated, on both sides of the Atlantic *prophecy* is more common for the noun, *prophesy* for the verb.

PLURALS

1. The plurals of English nouns are regularly formed in writing by the suffixation of the letter *-s* (*hat*→*hats*) or the letters *-es* (*cross*→*crosses*) and in speaking by the addition of the sound \s\ (\'hat→\'hats\), the sound \z\ (\'bói→\'bóiz\), or the sound \sz\ (\'kròs→\'kròsəz\). Although there are many exceptions to be noted, this regularity is so dominant that in theory all English nouns may be said to be capable of an analogical plural in the letters *-s* or *-es*, and in practice little hesitation in so forming a new or unknown plural should be felt. Native speakers of English have no difficulty in using the sounds of pluralization in accordance with regular patterns. This treatment of plurals will be limited to written words, typically selected, not exhaustive.

2. -s. Most nouns simply add *-s*: *bag*→*bags*; *violet*→*violets*.

3. silent -e. Nouns ending in *-e* that is silent regularly add *-s*: *college*→*colleges*; *race*→*races*.

4. -es. Nouns ending in *-s*, *-z*, *-x*, *-ch*, or *-sh* regularly add *-es*: *buzz*→*buzzes*; *dash*→*dashes*; *fox*→*foxes*; *gas*→*gases*; *torch*→*torches*.

5. consonant + -y. Nouns ending in *-y* preceded by a consonant regularly change *-y* to *-i* and add *-es*: *army*→*armies*; *courtesy*→*cour-*

tesies; *sky*→*skies*; except proper names: *Germany*→*Germanys*; *Kentucky*→*Kentuckys*; *Mary*→*Marys*.

6. -quy. Nouns ending in *-quy* regularly change *-y* to *-i* and add *-es*: *colloquy*→*colloquies*.

7. vowel + -y. Nouns ending in *-y* preceded by a vowel (except those ending in *-quy*) regularly add *-s*: *bay*→*bays*; *boy*→*boys*; *guy*→*guys*; *key*→*keys*.

8. vowel + -o. Nouns ending in *-o* preceded by a vowel regularly add *-s*: *duo*→*duos*; *embryo*→*embryos*; *studio*→*studios*.

9. consonant + -o. Most nouns ending in *-o* preceded by a consonant add *-s*: *alto*→*altos*; *ego*→*egos*; *piano*→*pianos*; *two*→*twos*; but other nouns ending in *-o* preceded by a consonant add *-es*: *echo*→*echoes*; *hero*→*heroes*; *potato*→*potatoes*. The consonant or cluster preceding the *-o* does not determine whether the plural will add *-s* or *-es*. A few nouns add either: *bravo*→*bravos/bravoes*; *cargo*→*cargos/cargoes*; *domino*→*dominos/dominoes*; *zero*→*zeros/zeroes*.

10. -oo. Nouns ending in *-oo* regularly add *-s*: *coo*→*coos*; *cuckoo*→*cuckoos*; *tattoo*→*tattoos*.

11. -i. Most nouns ending in *-i* add *-s*: *rabbi*→*rabbis*; *ski*→*skis*; but a few add either *-s* or *-es*: *taxi*→*taxis/taxis*.

12. -f. A few nouns ending in *-f* change the *-f* to *-v* and add *-es*: *leaf*→*leaves*; *self*→*selves*; *thief*→*thieves*; *wolf*→*wolves*; but some of these also add *-s* without consonant change: *calf*→*calves/calfs*; *wharf*→*wharves/wharfs*.

13. -fe. A few nouns ending in *-fe* change *-f* to *-v* and add *-s*: *knife*→*knives*; *life*→*lives*.

14. uniliteral words. Single letters, numbers, figures, and signs add either apostrophe and *-s* or just *-s*: *A*→*A's/As*; *4*→*4's/4s*; *1920*→*1920's/1920s*; Δ → Δ 's/ Δ s; $\#$ → $\#$'s/ $\#$ s.

15.1 nouns formed from abbreviations. Abbreviations formed by literation and used as nouns add either apostrophe and *-s* or more often just *-s*: *GI*→*GI's/GIs*; *IQ*→*IQ's/IQs*; *Ph.D.*→*Ph.D.'s/Ph.D.s*.

15.2 Abbreviations formed by truncation or contraction usually add *-s* without apostrophe: *apt*→*apts*; *bbl*→*bbls*; *cap*→*caps*; *mt*→*mts*; but some become plural without any change: *1 hr*→*4 hr*; *1 mo*→*4 mo*; *1 oz*→*4 oz*; *1 yd*→*4 yd*.

15.3 Some single-letter abbreviations double an initial consonant: *c*→*cc*. (chapters); *p*→*pp*. (pages); *v*→*vv*. (verses, violins).

16. -en. One noun usually adds *-en*: *ox*→*oxen*; and another changes the stem and adds *-en*: *child*→*children*; and one sometimes changes the stem and adds *-en*: *brother*→*brethren*.

17. umlaut. Six nouns change the medial vowel: *foot*→*feet*; *goose*→*geese*; *louse*→*lice*; *man*→*men*; *mouse*→*mice*; *tooth*→*teeth*. Compounds in which one of these is the final element likewise change: *dormouse*→*dormice*; *Englishman*→*Englishmen*; *eyetooth*→*eyeteeth*; *forefoot*→*forefeet*; *woman*→*women*.

18. foreign endings. Many nouns of foreign origin retain the foreign plural; most of them have also a regular English *-s* or *-es* plural, which is often preferred, although sometimes a foreign plural signals a difference in meaning (compare *stadia* and *stadiums*).

18.1 Latin. Most of these common anglicized foreign words come from Latin: *alga*→*algae*; *minutia*→*minutiae*; *alumnus*→*alumni*; *fungus*→*fungi*; *index*→*indices*; *matrix*→*matrices*; *addendum*→*addenda*; *medium*→*media*; *ovum*→*ova*; *genus*→*genera*; *opus*→*opera*; *crux*→*cruces*; *nomen*→*nomina*; *apparatus*→*apparatus*; *series*→*series*.

18.2 Greek. The second largest group of anglicized foreign words comes from Greek: *analysis*→*analyses*; *ellipsis*→*ellipses*; *thesis*→*theses*; *criterion*→*criteria*; *phenomenon*→*phenomena*; *carcinoma*→*carcinomata*; *lemma*→*lemmata*; *aphis*→*aphides*; *phalanx*→*phalanges*.

18.3 Italian. A comparatively small number of Italian plurals have become anglicized: *bambino*→*bambini*; *dilettante*→*dilettanti*; *libretto*→*libretti*.

18.4 French. A small number of French plurals have been anglicized: *adieu*→*adieux*; *beau*→*beaux*; *madame*→*mesdames*; *monsieur*→*messieurs*.

18.5 miscellaneous: *cherub*→*cherubim* (Hebrew); *fellah*→*fellahin* (Arabic); *senor*→*senores* (Spanish).

19.1 compounds. Two-word compounds consisting of initial noun plus adjective hyphenated or open customarily pluralize the noun: *cousin^g german*→*cousins-german*; *heir apparent*→*heirs apparent*; *knight-errant*→*knights-errant*; but not invariably; sometimes the adjective is construed as a noun and a regular suffix is alternatively added to it: *attorney general*→*attorneys general/attorney generals*; *court-martial*→*courts-martial/court-martials*; *notary public*→*notaries public/notary publics*; *sergeant major*→*sergeants major/sergeant majors*. In similar-appearing compounds in which the second word is a noun a regular suffix is added at the end: *brigadier general*→*brigadier generals*; *judge advocate*→*judge advocates*. A few similar compounds have double plurals: *gentleman-usher*→*gentlemen-ushers*; *lord justice*→*lords justices*; *thing-in-itself*→*things-in-themselves*.

19.2 Three-word compounds consisting of initial noun plus prepositional phrase hyphenated or open customarily pluralize the initial noun: *aide-de-camp*→*aides-de-camp*; *brother-in-law*→*brothers-in-law*; *man-of-war*→*men-of-war*.

20. animals. Many names of fishes, birds, and mammals have both a plural with a suffix and a zero plural that is identical with the singular. Some have one or the other. Some present a choice according to meaning or according to a special interest of the user.

20.1 Examples of some that form a plural with a suffix (except occasionally when modified by an adjective like *wild*, *native*, *sea*, *mountain*): *bird*, *cow*, *crow*, *dog*, *eagle*, *hen*, *monkey*, *rat*, *shark*, *swallow*.

20.2 The following have both plurals of which the zero plural is likely to be preferred by those who hunt or fish: *antelope*, *bear*, *doe*, *duck*, *flounder*, *hare*, *quail*, *rabbit*, *raccoon*, *squirrel*, *tuna*.

20.3 The following have both plurals of which the zero plural is the commoner but the plural with a suffix is used to signify diversity in kind or species (*trouts* of the Rocky mountains; *fishes* of the Atlantic): *bass*, *cod*, *elk*, *pike*, *pout*.

20.4 The following customarily prefer the zero plural: *cattle*, *deer*, *grouse*, *moose*, *sheep*, *swine*.

21. numbers. A small number of general terms for numbers or quantities have both a plural form with suffix and a zero plural used in some constructions: *brace*→*brace/braces*; *dozen*→*dozen/dozens*; *hundred*→*hundred/hundreds*; *score*→*score/scores*.

22. peoples. Many names of tribal origin have a zero plural and also an anglicized plural with suffix: *Bantu*→*Bantu/Bantus*; *Choctaw*→*Choctaw/Choctaws*; *Eskimo*→*Eskimo/Eskimos*.

23. -ese. Most names derived from a place name and ending in *-ese* have only a zero plural: *Burmese*, *Cantonese*, *Chinese*, *Japanese*, *Portuguese*.

0.1 Speech consists not merely of sounds but of organized sound sequences that follow various structural patterns and are uttered with significant modifications of pitch and stress and significant pauses. Besides representing the basic sounds of speech, the English writing system accordingly utilizes signs called punctuation marks to separate groups of words and to convey some indication of the varying pitch and volume and especially the pauses in the flow of speech sounds.

0.2 A pause in speech is accompanied by a significant adjustment in the pitch of the voice, which may rise, fall, or remain the same. There may also be an increase or decrease in stress with or without actual cessation of sound. Three principal types of pauses are readily perceptible in English speech: (1) The fading pause, a falling into silence with a full stop, is marked by a lowering of pitch and decrease of stress until the production of sound ceases. This pause signifies the termination of an utterance and in writing is usually indicated by the period or the semicolon. (2) The rising pause is characterized by an upturn in pitch often combined with a lengthening of word sounds just before the break. This pause is used to set off word groups within utterances, especially whenever there is anticipation of supplementary or explanatory matter to follow, and is usually indicated in writing by a comma or, at the end of a question, by a question mark. (3) The sustained pause occurs whenever there is a break without any change in the pitch of the voice or when the same pitch is continued across a break. This pause is often indicated in writing by a comma, particularly when a rising pause would also be appropriate. The sustained pause is indicated also by such marks as a dash or ellipsis where a person stops speaking without altering the pitch of his voice, as when he is interrupted.

0.3 Much written expression consists of discourse never actually spoken but formulated in the writer's mind and immediately expressed in writing. Somewhat more formal in its structural patterns than actual speech, such written expression is nevertheless a reflection of the spoken language, is itself capable of being spoken, and is therefore punctuated as the written expression of actual speech.

0.4 As will be indicated, punctuation marks are often used in an arbitrary or mechanical manner not directly related to language structure or to patterns of speech sounds. To a considerable extent, however, punctuation may be explained in terms of the structural divisions of speech — sentences, clauses, phrases, and other word groups — and some of the more obvious elements of pitch, stress, and pause that indicate their separation or their relationship.

1.1 Like a fading pause and full stop in speech, a **period** usually terminates a sentence that is neither interrogative nor exclamatory (The mountain is 5000 feet high. If the climbers have a good day, they will reach the top in a few hours. At the summit they will eat the lunch which has been prepared, and then they will start down early enough to reach the bottom before dark.)

1.1.1 Utterances terminated by a fading pause do not always have a complete subject-predicate structure. In the context of consecutive speech, however, the meaning of such utterances is entirely clear, and in writing they are usually terminated with a period (<“Tell me when you came in.” “Just now.”> <“Please close the door.” “Certainly.”>)

1.1.2 Structurally incomplete or fragmentary elements terminating in a period occur frequently in modern narrative writing and are usually

terminated with a period (The sound of artillery through the night. The enemy again. Bringing away to keep everyone nervous and awake.)

1.2 A period often follows an abbreviation (Reedville, Mass., pop. 879) (cap. or l. c.) (7 a. m.) (30 mins.) (lg. pkg.) (no. 72) (5s. 6d.) (bks. marked o. p.) (dept. bulls.) (50 pp.) (U. S. S. *Wyoming*) (Dr. John H. Doe, 7 Pine St., New York, N. Y.) (Dec. 7, 1941) (Lt. Col. John Doe)

1.2.1 Periods do not usually follow abbreviations of compound names of international organizations and government agencies, official abbreviations designating equipment, and a large number of similar compound abbreviations usually written without spaces (NATO) (UN) (UNESCO) (TVA) (VT fuze) (pfc) (EST)

1.2.2 Periods usually follow common contractions made by omitting medial letters (secy.) (advt.) (mfg.) (recd.)

1.2.3 Some publishers, chiefly British, often do not put a period after *Mr*, *Mrs*, and *Dr* (Dr and Mrs John H. Doe)

1.2.4 A period does not follow symbols of chemical elements (Al) (Cu) (U 235)

1.2.5 Such terms as 1st, 2d, 3d, 4th, 8vo, and 12mo are not abbreviations and do not require a period.

1.2.6 Isolated letters of the alphabet used as designations do not require a period (T square) (A 1) (I beam)

1.2.7 After titles of books and articles, after headings, and in display printing, printers usually omit a period at the ends of lines, as well as other punctuation except an essential question mark or an exclamation point.

1.3 A period is necessary before a decimal and between dollars and cents in figures (16.63 ft.) (.32 cal.) (\$12.17)

1.4 A period may or may not follow a roman numeral. In particular contexts usage is often quite uniform; thus a period is used after a roman numeral designating a chapter of a book in the Bible (2 Sam. xix. 12) but no period is used after a roman numeral following a personal name (Elizabeth II of England)

1.5 Dictionaries use centered periods to indicate division between syllables of words where division is not otherwise indicated by accent marks or hyphens.

2.1 A question mark usually indicates in writing the incompleteness or anticipation conveyed in speech by any of various intonation patterns and frequently though not exclusively by a rising pause. The word order may be that of a question or a statement (When did he leave?) (You say he never came back?) (An Oxford degree — or was it foreign travel? — lured him to England.)

2.1.1 A question mark does not follow an indirect question, which has the intonation pattern and fading pause of a positive statement (They are asking him where he plans to go.)

2.1.2 A request expressed in interrogative form for the sake of courtesy usually ends in a period

corresponding to the fading pause of a positive statement (Will you kindly fill out this questionnaire and return it to the personnel office.)

2.1.3 When used as the terminal mark of a direct quotation, the question mark, as well as the exclamation point, usually takes the place of a comma or period which would otherwise be used at that point in the sentence (After he had affixed the title "What is Progress?" he folded the manuscript of his speech.)

2.2 A question mark, usually enclosed in parentheses, often follows arbitrarily after a word, phrase, or date to indicate uncertainty of its accuracy or to mark a gap in available information (Omar Khayyám, Persian poet (?–1123?))

3.1 An exclamation point follows an expression or statement that is an exclamation and corresponds to a heavy, relatively high-pitched terminal stress in speech (Oh no! Not that!) (I wish he would!) (Do you think we will stand for this any longer!) (Hurry! We need help!)

4.0 Of all the marks of punctuation the comma offers the most difficulty in use and the widest range for individual choice. Though often marking rhetorical or elocutionary pauses, the comma is used primarily to separate or to set off in a group. It sometimes distinguishes nonrestrictive modifiers from restrictive modifiers. Since the genus-terms of definitions in this dictionary are intended to be modified only by differentiae that are restrictive in some degree, the use of commas either to separate or to group is severely limited chiefly to units in apposition or in series.

4.1 Commas That Set Off. A word, phrase, or clause is often inserted in a sentence to supply explanatory or supplementary information. In speech the rising pause or sometimes the sustained pause sets off such material when it is of relatively minor importance and is not essential to the main idea. In writing, commas usually indicate the subordinate status of such matter. These commas always make a pair unless the element set off begins or ends a sentence.

4.1.1 Commas usually set off words, phrases, and other sentence elements that are parenthetical or independent. Items of this sort are contrasting expressions, prefatory exclamations, the names of persons directly addressed, and expressions like *he said* in direct quotations (Work, not words, is what is needed.) (The outcome, though hardly to our liking, is better than expected.) (The animals, nervous and restless, pace interminably in their cages.) (He is often late, to be sure, but we can rely on him in a crisis.) ("Listen, John," he said, "drive carefully.") (Oh bosh, pay no attention to him (the comma that goes with the comma after *bosh* gives way to the capital *O*.)

4.1.2 Commas usually set off appositional or modifying words, phrases, or clauses that do not limit or restrict the main idea of a sentence. Such constructions are termed nonrestrictive (George, his own brother, is turning against him.) (John, whom we saw yesterday, is away today.) (His father, dressed in a new gray suit, came early for the ceremony.) The second of the pair of commas in the next three gives way to the period that closes the sentence (There stood John, smiling quietly to himself.) (We leave at 3 o'clock, when the bell rings.) (The formation is of great interest to geologists, although most of us would hardly notice it.)

4.1.2.1 When inserted or appended words, phrases, or clauses are restrictive or essential to the main idea of a statement, they are spoken without the pauses or other significant intonation that would indicate matter of minor importance. In writing, commas are likewise unnecessary (His friend George is turning against him.) (The man whom we saw yesterday is not here today.) (The man dressed in the new gray suit is his father.) (John is the boy standing in the rear and smiling to himself.) (We leave when the bell rings.) (He will come if his safe-conduct is guaranteed.)

4.1.2.2 Sometimes the presence or absence of commas corresponding to spoken pauses constitutes the sole means of determining whether a phrase or clause is essential or nonessential, restrictive or nonrestrictive (Our friends, who live out of town, do not like the new parking laws/Our friends who live out of town do not like the new parking laws.) (The men, draining the swamp, searched all day for the boy/The men draining the swamp searched all day for the boy.) (We do not visit him, because he always serves liquor/We do not visit him because he always serves liquor.)

4.1.3 Commas set off transitional words and expressions (as on the contrary, on the other hand, consequently, furthermore, moreover, nevertheless, therefore) whenever they are or would be spoken with the adjacent rising or sustained pauses that indicate subordinate matter (The question, however, remains unsettled.) (Nevertheless, we shall go.) (On the contrary, under the rules a vote is in order.)

4.1.3.1 Such expressions may occur in context so as to be spoken without significant pauses and may likewise require no punctuation (We shall therefore proceed with the operation.) (The weaklings will consequently be forced to drop out.) (A clear-cut decision is on the other hand too much to expect.)

4.2.1 Commas That Separate. Various expressions are often used in sentences to introduce or qualify something that follows. To separate these elements in speech a rising or sustained pause denotes the end of the introductory information and the beginning of the main part of the statement. In writing, a comma accordingly often separates an introductory word or phrase from the rest of the sentence, particularly when the introductory material is long or when ambiguity might otherwise occur (Unfortunately, we shall have to decline the invitation.) (In the first place, you will get very little information from him.) (To gain popularity, he betrayed his convictions.) (Immediately upon reaching the surface, he swam to shore.) (Seeing the dog approaching, he ran off down the street.)

4.2.2 Whenever in spoken English there is an enumeration of items, a rising or sustained pause separates and distinguishes each member of the series. In writing, a comma likewise usually separates words, phrases, or clauses that occur in a series (The estate is to be divided among Robert, John, and William.) (Trees, trees, trees were all we could see.) (He opened the can, removed the contents, and replaced the lid.) (The one who befriended us, watched over us, and gave us help is now no more.) (The prisoner will not talk, he refuses to eat, and he pounds the bars continually.)

4.2.2.1 Before *and* or *or* introducing the final

term in a closed series, writers usually put a comma (a, b, and c) (a coat, a hat, and a pair of gloves) (scientific, technical, and learned periodicals) but sometimes omit it in a short series (a coat, a hat and a pair of gloves) (a, b and c)

4.2.2.2 Modifying words in an open series preceding a noun are often separated and distinguished in speech by pauses and in writing by commas (a rural, agricultural, idyllic life) (journalistic, literary, popular publications). Sometimes, however, the pause and hence the comma may be unnecessary when the second modifier relates more closely to the noun than the first, or when the first modifier applies to the second modifier and the noun as a unit (a quiet rural atmosphere) (a vivid red tie) (a brilliant military strategist)

4.2.3 Statements or clauses joined by a coordinating conjunction are separated in speech by a sustained or rising pause. In writing, a comma usually effects this separation (He seemed inattentive, but not a word escaped him.) (His face showed his disappointment, for he knew he had failed.) (He did not like intruders of the sort that now confronted him, nor did he see any way of avoiding them.) (She knew very little about him, and he volunteered nothing.)

4.2.3.1 When the statements or clauses joined by a coordinating conjunction are brief and unambiguous, and usually when the subject is the same, the comma may be omitted (He will suffer but he will recover.)

4.2.3.2 A comma alone without the conjunction sometimes separates brief and closely related statements or clauses. In such instances a sustained or slightly falling pause may occur in speech rather than the fading pause and full stop designated by the period (The boy went to the store, then he went home.) (Don't bother, it doesn't make any difference.) (He would always remember, the experience was now a part of him.) This comma may or may not be permissive in the treatment of the comma fault in various handbooks of composition.

4.2.3.3 When a conjunction joins two predicative constructions that have the same subject, the clarifying pause in speech may be slight or imperceptible. In writing, a comma is likewise not considered necessary except to avoid ambiguity (The car teetered for a moment on the edge of the road and then plunged down the embankment.) (Sailing an iceboat is thrilling sport but requires great skill.)

4.2.4 Corresponding to the rising or sustained pause necessary in speech to distinguish items in addresses and dates, a comma usually separates such matter in writing (Born January 1, 1900, in Delhi, India, the university's outstanding student received his college degree in June, 1922.) (Apply for the booklet at the Superintendent of Documents, Washington 25, D. C.)

4.2.4.1 Usage is about evenly divided, however, when the day is not given (in June 1922) or (in June, 1922)

4.2.4.2 Sometimes writers omit the comma after the year (born January 1, 1900 in India)

4.2.5 When such expressions as *namely*, *that is*, *i. e.*, *e. g.*, *viz.* introduce an illustration or example, a comma that corresponds in function to

a rising or sustained pause in speech usually separates it from what follows (There are two ways to do the job: namely, a right way and a wrong way.) (He forbade future forays; that is, there were to be no more raids on the neighbors' gardens.)

4.2.6 A comma usually indicates the place of an omitted word or word group to achieve a separation like that effected in speech by a sustained or rising pause (The tractor is used for hauling; the bulldozer, for excavating.)

4.2.7 Like a sustained or rising pause in speech, a comma usually separates a direct quotation from the rest of a sentence or context ("Make way for liberty," he cried.) (He asked abruptly, "Which way do you vote?") (As some say, "Virtue is its own reward.")

4.3 Commas Used Arbitrarily. The comma often functions in an arbitrary manner as a mechanical device.

4.3.1 In numbers the comma usually separates thousands, millions, and other groups of three digits except in dates, page numbers, and street numbers, and in numbers of four digits (an altitude of 7525 feet) (3600 rpm)

4.3.2 A comma usually sets off inverted names in bibliographies and reference lists (Doe, John, Jr.)

4.3.3 A comma usually separates a proper name and an academic or honorary title, also two or more such titles in succession (John Doe, M.A., Ph.D., President)

4.3.4 A comma is the customary mark after the salutation in personal letters and after the complimentary close in all letters (Dear Jack,) (Sincerely yours,) (Yours very truly,)

4.4.1 One may avoid excessive or uncertain use of the comma by eliminating commas, excepting those used arbitrarily, where there are no significant pauses. In terms of structure, a comma does not usually separate closely related grammatical sequences (The advice his father gave him/remained long in his mind.) (The result of the long and detailed planning was / that the forces were well prepared for the battle.) (The flea-bitten, shaggy / dog padded desolately down the alley.) (The long, happy, and successful trip/was one he will never forget.) (His new car is a fast / and powerful machine.)

4.4.2 It is equally important to insert a comma to prevent misreading or ambiguity. The need for a rising or sustained pause in speech usually indicates that a comma is necessary in writing (Inside, the fire was burning brightly.) (Ever since, the little man comes at dark to clean the kitchen.) (Whoever lost it, lost an invaluable treasure.) (To Ruth, John appeared as a mighty warrior on a white horse.) (In 1925, 25 percent of the graduates of the school went on to college.) (The railroad had no resources, but the trains were somehow kept running.) (As the car struck, the utility pole fell with a crash.)

5.1 In general the **semicolon** functions as a weak period or as a strong comma. As a weak period the semicolon corresponds to a fading pause and full stop in speech similar to but perhaps not quite as final as that represented by a period. As a strong comma the semicolon cor-

responds to a rising or sustained pause in speech possibly longer or slightly more definitive than that represented by a comma.

5.1.1 As a weak period a semicolon usually separates independent statements or clauses joined together in one sentence without a conjunction. Such statements or clauses are usually closely related (Make no terms; resist until the last breath.) (A fool babbles continuously; a wise man holds his tongue.)

5.1.2 As a weak period a semicolon usually separates two statements or clauses when the second begins with a sentence connector or conjunctive adverb, as *accordingly, also, consequently, furthermore, hence, however, indeed, moreover, nevertheless, otherwise, so, still, then, therefore, thus, yet* (You have recommended this man; therefore I will give him a trial.) (His conduct has always been exemplary; nevertheless he will not be permitted to go.)

5.1.3 As a strong comma a semicolon usually separates phrases or clauses that are themselves broken up by punctuation (The country's resources consist of large ore deposits; lumber, waterpower, and fertile soils; a favorable climate; and a strong, rugged people.) (When the presently available natural resources are greatly depleted, man will have to develop new sources of food and power; and then will come the real test of his energies, his imagination, and his ingenuity.)

5.1.4 A semicolon sometimes separates arbitrarily in lists of names with addresses, titles, or figures where a comma alone would not clearly separate items or references (Genesis 3:1-19; 4:1-16)

6.1 The colon, corresponding to a fading or sustained pause in speech, is a rhetorical mark of supplementation. It links clauses, phrases, or less often single words; it indicates that what follows it coordinates with some element of what precedes or sometimes with all of what precedes back to the beginning of a sentence. Specific types of supplementation are mentioned in parentheses after the examples (The same forced yes-or-no choice appears on referenda on public questions: the voter cannot express approval of some parts and disapproval of others unless amended. (elaboration)) (It vigorously opposes clandestine marriages: that is, marriages which were made outside the auspices of the Church. (definition)) (His ambition must be stirred: his greed must be played upon. (balance)) (The following items of equipment are necessary: sleeping bag, ground cloth, cooking utensils, and a small axe. (enumeration)) (Representatives of ten countries presented papers at the formal meetings, including: Brazil, England, France, Holland, India, Italy, Japan, the United States, the U. S. S. R., and West Germany—Allen Kent. (enumeration)) (The author never exploits any whimsical or romantic elements in this subject: he maintains throughout the decent, workmanlike attitude he has set himself. (restatement)) (Local currencies, like local laws, were not suppressed: they were encouraged to improve. (antithesis)) (His death raised the possibility that his political heirs might seek the final solution for insolvent, disorganized governments: war. (summation)) (The question is this: will the removal of restrictions lead to freedom or license? (apposition))

Usually what precedes a colon is general and what follows is specific but sometimes the rela-

tion is reversed (Physics and biology, evolution and anthropology, conservation and religion: he discusses them all.)

Sometimes paired colons correlate (He has ambition: it must be stirred. He has a belief in fair play: it must be honored.)

Frequently the colon is reinforced by anticipatory phrasing (as *thus*, *namely*, *for example*, *as follows*).

6.2 A colon functions as a mechanical device in set formulas involving separation of parts, as when relating the antecedent of a ratio to its consequent (12 : 19) or one ratio to another (12 : 19 :: x : 57) or when relating subdivisional units in a descending series to specify or particularize one member, especially in time-telling by hour, minute, and second (2:31:30), in bibliographical reference by volume and page (*National Geographic* 33:89) or by chapter and verse (Luke 2:12) or by place and publisher (Springfield : G. & C. Merriam Co.), or in accounting by pounds, shillings, and pence (46 : 6 : 11)

6.3 A colon symbolizes a conventional separation or emphatic pause after a formal salutation in a letter (Dear Sir:) or an address (Mr. Chairman, Ladies and Gentlemen:) or between a book title and a subtitle not otherwise differentiated (*Victory : A History of the Recent Struggle*)

6.4 A colon introduces a quotation especially when quotation marks are omitted and when the quoted matter is indented (We quote from the text: "Greater love hath no man":)

He reads these words from Ruth:
Whither thou goest, I will go.

Mother: Where did you go?
Child: I won't tell.

A colon joins terms that are being contrasted or compared and is sometimes centered or spaced (Seventeenth century rhymes include *prayer: afar* and *brass : was : ass.*) (The stature of the two sexes shows very nearly the same female : male proportions.)

7.0 In its function in writing and in the speech intonation to which it corresponds, the **dash** is similar to the comma and the colon, and a pair of dashes is similar to parentheses.

7.1 A dash usually marks an abrupt change or suspension in the thought or structure of a sentence (If you will listen I will explain — but perhaps another time will be better.) (The mountain we climbed is higher than — oh, never mind how high it is.) (He was — how shall I put it — a controversial figure to say the least.) ("Yes, but I — er — I'll have to —" and he stopped hopelessly.)

7.2 A dash often makes parenthetical, appositive, or explanatory matter stand out clearly or emphatically (Three of the country's most important products — oil, steel, and wheat — are produced in greater quantities than ever before.) (Two of our group — Eddie and John — came walking down the street.) (He is willing to discuss all problems — those he has solved and those for which there is no immediate solution.)

7.3 A dash often occurs before a summarizing statement or clause (Oil, steel, and wheat — these are the sinews of industrialization.)

7.4 A dash sometimes sets off appositional or parenthetical matter that is introduced by such expressions as *namely*, *for example*, *that is* (Sports

develop two valuable traits — namely, self-control and the ability to make quick decisions.)

7.5 A dash often mechanically precedes the name of an author or source at the end of a quoted passage (There is a tide in the affairs of men which, taken at the flood, leads on to fortune — William Shakespeare) ("In the beginning God created the heavens and the earth" — Genesis 1:1)

7.6 A long dash often functions as a notational device to indicate the omission of a word or of letters in a word (yelling — loudly) (Mr. M — of New York) (go to the d —)

7.7 A short dash — slightly larger than a hyphen — often serves as an arbitrary equivalent of *to and including* between numbers or dates and in compounding capitalized two-word names with the hyphen (pages 40–98) (the decade 1951–60) (the New York–Lisbon plane)

8.1 Parentheses often set off parenthetical matter when the interruption is more marked than that usually indicated by commas (Three old destroyers (all now out of commission) will be scrapped.) (He is hoping (as we all are) that this time he will succeed.)

8.2 Parentheses often set off supplementary or explanatory matter that is not a part of the main statement or not a structural element of the sentence (The more distant mountain (I think you have climbed it before) is our goal.) (The diagram (Fig. 3) illustrates the action of the pump.) (The Springfield (Illinois) stop is the first on the tour.)

8.3 Parentheses often mechanically enclose sequential numbers or letters in a series (but do not take the place of required punctuation) (We must clearly set forth (1) our long-term goals, (2) our immediate objectives, and (3) the means at our disposal.)

8.4 Parentheses usually arbitrarily enclose an arabic number confirming a number expressed in words (Delivery will be made in thirty (30) days.) (Payment due is twenty dollars (\$20.00).)

9.1 Brackets usually set off mechanically a word or phrase that is extraneous or incidental to the context, such as editorial interpolations (He wrote, "I am just as cheerful as when you was [sic] here.") (A fly is said to be a two-winged dipterous [does that make four wings?] insect.) (The officer in charge [General Doe] had to countersign the order.)

9.2 Brackets often function as parentheses within parentheses (Bowman Act (22 Stat., ch. 4, § [or sec.] 4, p. 50).)

10.1 Consisting usually of three spaced periods (**suspension points**) or asterisks and corresponding in effect to a sustained pause in speech, an **ellipsis** often indicates an interrupted or unfinished sentence. Wherever an ellipsis is terminal, a period follows ("I shall . . . that is . . . if we can only. . . ." He faltered and stopped speaking.) ("Cut the line and cast. . ." His voice was lost in the crash of the next wave.)

10.2 An ellipsis often occurs as a notational device to indicate an omission in quoted matter, as a word or a group of consecutive words unessential or undesirable for quotation ("Oh say can you see . . . what so proudly we hailed . . .")

10.3 An ellipsis on a line by itself in poetry indicates the omission of one or more lines of verse. Sometimes it consists of periods spaced and extended in number to the full measure of the line:

Thus driven
By the bright shadow of that lovely dream,
He fled

—P. B. Shelley

11.1 A **centered period** in a dictionary entry indicates syllabic or end-of-line division <dy-nam-ic>.

12.1.1 A **hyphen** is a mark of separation or division at the end of a line which terminates with a syllable of a word that is to be carried over to the next line <mill- [end of line] stone> <pas-sion>

12.1.2 A hyphen divides letters or syllables to give the effect of stuttering, sobbing, or halting <S-s-sammy> <ah-ah-ah> <y-y-es>

12.1.3 A hyphen suspends the second part of a hyphenated compound used in combination with another hyphenated compound <a six- or eight-cylind~~er~~ed engine> <in ten- and twenty-dollar bills>

12.1.4 Hyphens indicate a word spelled out letter by letter <p-r-o-b-a-t-i-o-n>

12.2 A hyphen before a word element indicates that it is a suffix or a terminal combining form <-ous> <-ship>

12.3 A hyphen after a word element indicates that it is a prefix or initial combining form <anti-> <fore->

12.4 Hyphens before and after a word element indicate that it is a medial word element <-o->

13.1 **Quotation marks** often enclose a direct quotation from a speaker or from a text or other written matter <"When I am dead," said one of the keenest of modern minds, one of the greatest of modern poets, "lay a sword on my coffin, for I was a soldier in the war for the liberation of humanity.">

Quotation marks are not used to enclose oft-quoted familiar phrases (as to *err is human*). Quotation marks are not used to enclose indirect quotations (<direct — The man said, "I am going home.">) (<indirect — The man said that he was going home.>)

13.2 In long quotations, excepting extracts from plays, left-hand quotation marks are placed at the beginning of every paragraph included in the quotation in addition to those placed at the beginning and at the end of the selection.

13.3 Quotation marks are usually not used when the quoted matter is set in smaller type or in paragraphs indented on both sides.

13.4 Single quotation marks enclose a quotation within a quotation; or if single quotation marks are used primarily, double quotation marks enclose a quotation within a quotation <The witness said, "I distinctly heard him say, 'Don't be late'; then I heard the door close.">

13.5 Quotation marks usually enclose titles of short poems, paintings, lectures, articles, and parts or chapters of books. (Titles of whole

books, periodicals, and newspapers are usually italicized in context.)

13.5.1 In American usage printers usually place a period or comma inside closing quotation marks whether it belongs logically to the quoted matter or to the whole sentence or context <The package is labeled "Handle with Care."> <The golden rule, "Do unto others as you would have them do unto you," is easier to remember than to practice.>

But when a logical or exact distinction is desired in specialized work in which clarity is more important than usual (as in this dictionary), a period or comma can be placed outside quotation marks when it belongs not to the quoted matter but to a large unit containing the quoted matter <The package is labeled "Handle with Care."> <This act may be cited as the "Army-Navy Medical Services Corps Act of 1947."> <The Prime Minister, after reporting the negotiations, declared resolutely, "Our only course is to resist aggression."> <Replying with the one word "Bunk", he subsided.>

13.5.2 Only one other mark accompanies closing quotation marks, whether the quotation and the whole sentence or context call for the same mark or for different marks <Did he keep asking you, "What is your number?"> <We shouted in unison, "Where do you think you're going?"> <Just as he screamed, "I will not!" he slammed the door.> <[Is this the gratitude I receive, to have you bellow, "Get out of here and don't come back!"]>

13.5.3 A colon or semicolon is usually placed outside of quotation marks <"Fame is proof that people are gullible"; with this quotation he retired in silence.>

13.5.4 A colon or semicolon is sometimes placed inside the quotation marks when it belongs inseparably to the quotation <"Sirs:" is a salutation used in letters to a newspaper.>; however, a terminal colon or semicolon of quoted matter incorporated in a sentence usually gives place to appropriate end punctuation.

13.5.5 A question mark or exclamation point is usually placed inside or outside the quotation marks according to whether it belongs to the quoted matter or to the whole sentence or clause that includes the quotation <Can you forget his angry exit after he shouted "Include me out?"> <"And what do you think of this new novel?" his friend asked.>

13.6 Quotation marks, often single quotation marks, sometimes enclose technical terms unfamiliar to the reader; words used in an unusual sense; and coined words, trade or shop jargon, or slang for which the writer implies a slight apology <An "em" is a unit of measure used in printing.> <The plates of copper are hung by "corrosion hooks" in the acid.> <This venture is a "wildcat" invented to prey upon the unwary.> <We've had enough of your "unshrinkable" shirts.> <He is "goofy" according to their lingo.>

14.0 An **apostrophe** and *s* are usually added to a noun to indicate ownership or a relation analogous to ownership. This possessive form is a survival of the *es* ending in Old and Middle English, from which the vowel sound has disappeared in Modern English except in nouns ending with the sound /s/, /z/, /ʃ/, /ʒ/, /ch/, or /j/. In early Modern English the *s* of the possessive was

often dropped from the possessive of nouns already ending in an *s* or *z* sound, both in speaking and in writing, leaving only the apostrophe in writing, as is evident in various idioms and in poetry. Since the middle of the 19th century, however, the form with the apostrophe and *s* has been generally adopted for the possessives in which the extra syllable is not awkward to pronounce in context.

14.1 An apostrophe and *s* form the possessive case of singular or plural nouns that do not end in an *s* or *z* sound (boy's) (carpenter's) (dog's) (president's) (at his wit's end) (garage's responsibility) (Senator Doe's constituency) (the church's policy) (men's) (Descartes's philosophy) (Delacroix's painting)

14.2 An apostrophe either with or without *s* forms the possessive case of singular nouns ending in an *s* or *z* sound.

14.2.1 Singular nouns ending in an *s* or *z* sound that consist of one syllable or have a primary or secondary accent on the last syllable usually add an apostrophe and *s* to form the possessive case (the class's recitation) (the press's description) (the fox's tail) (King James's reign) (Laplace's theories) (the marquise's jewels)

14.2.2 Singular nouns ending in an *s* or *z* sound that consist of more than one syllable and have no primary or secondary accent on the last syllable often add the apostrophe and *s* to form the

possessive case unless the additional syllable with the *s* or *z* sound would be unpleasant or difficult to pronounce in context. Sometimes such a syllable is necessary to avoid ambiguity in pronunciation. Usage is divided in this matter (1) (an audience's / audience' reaction) (the waitress's / waitress' duties) (the phoenix's / phoenix' nest) (for appearance's / appearance' sake) (2) (Dr. Adams' / Adams's services) (the octopus' / octopus's snaky appearance) (Dickens' / Dickens's novels)

14.2.3 With some exceptions various classical and biblical names are treated as in 14.2.1 and 14.2.2 (Zeus's son) (Mars's help) (Venus's / Venus' / Judas's / Judas') but (Brutus' / Brutus's) (Odysseus' / Odysseus's), and (Jesus' (Moses') (Pythagoras's / Pythagoras') (Herodotus's / Herodotus') (Oedipus's / Oedipus'), but (Aristophanes' / Aristophanes's) (Socrates' / Socrates's) (Thucydides' / Thucydides's)

14.3 An apostrophe without *s* usually forms the possessive case of plural nouns ending in an *s* or *z* sound (consumers' protest) (foxes' holes) (the Joneses' invitation) (the two chateaux' occupants) but (geese's) (lice's) (mice's)

14.4 An apostrophe and *s* usually form the possessive case of various indefinite pronouns (anybody's) (anyone's) (everybody's) (everyone's) (somebody's) (someone's) but no apostrophe is used in the possessive pronouns *his*, *hers*, *its*, *ours*, *yours*, *theirs*.

COMPOUNDS

1.1 A *compound*, as the term is used here, is a word or word group of two or more elements at least one of which is an independent word of the same language. The elements in an English compound are variously written solid, open, or hyphenated when they are all English words that can be written independently. When one of the elements in an English compound is not an independent English word, the elements are usually solid (*watery*, *antiperiodic*, *predate*) or hyphenated (*de-emphasize*).

1.2 To show in a dictionary all of the stylings that are found for English compounds would necessitate excluding other information much more likely to be sought by the dictionary user. This dictionary therefore limits itself almost without exception to a single styling for a compound. When a compound occurs frequently and one styling predominates, this styling is used. When a compound is rare or when the examples indicate that two or three stylings are approximately equal in frequency, the choice is based on the analogy of parallel compounds or is made arbitrarily.

2.1 The dependent element in most compounds formed within English is a prefix or a suffix. It is added to several or many English words and exerts the same modification of sense on all of them.

2.1.1 Prefixes in borrowed compounds. In prefix-containing foreign-language compounds borrowed into English, if the prefix ends and the base word begins with the same vowel letter, a hyphen is often used between the two vowels, or a diaeresis is sometimes placed over the second vowel (*co-operate*/*coöperate*) but usually the

form is solid (*cooperate*). If two vowels that are not identical come together at the point of juncture, usually neither hyphen nor diaeresis is used (*coalesce*, *coerce*). If the junctural letters are two consonants, or a vowel and a consonant, or a consonant and vowel, neither hyphen nor diaeresis is used (*collect*, *diagram*, *anarchy*).

2.1.2 Prefixes in compounds formed within English. In prefix-containing compounds formed in English a prefix and a base word are seldom open-styled. Some combinations are usually close-styled (*in-* and *un-*, as in *inexpressible*, *untenable*), some are usually hyphenated (*ex-* in *ex-president*), some are frequently styled either way (*anti-*, *co-*, *extra-*, *non-*, *pre-*, *semi-*). With prefixes of this last class the hyphenated styling is usual when the prefix ends with a vowel letter and the base word begins with the same letter (*anti-* + *intellectualism*, *infra-* + *angelic*, *semi-* + *independent*); the hyphenated styling is less frequent when the junctural letters are two vowels that are not identical (*de-* + *adjectival*, *fore-* + *oath*); but solid styling is usual when the junctural letters are two consonants, or a vowel and a consonant (*non-* + *metallic*, *non-* + *alcoholic*, *extra-* + *legal*).

2.1.3 When the base word begins with a capital, a hyphen is usual (*un-* + *American*).

2.1.4 Some elements sometimes regarded as prefixes function as adjectives when they stand open before a noun (*a pseudo liberal*; *quasi independence*). But a styling like *a semi annual sale* is seldom seen outside newspaper advertisements.

2.1.5 When a prefix governs two or more words, it is almost invariably followed by a hyphen, and

the styling of the group of words to which the hyphen applies varies: sometimes the members of the group are left spaced, sometimes they are hyphenated (*an ex-vice president/an ex-vice-president, pre-World War prices/pre-World-War prices, the ex-Republican majority leader/the ex-Republican-majority-leader*). Although spaced styling in such cases is often ambiguous, mere substitution of hyphens for spaces is not always a solution.

2.1.6 Sometimes the same succession of letters forms two words that contain the same prefix but that are different in sense, pronunciation, and styling, one word being solid and the other hyphenated. In such cases the solid compound was formed in and borrowed from another language; the hyphenated compound was formed in English; the second element may or may not be ultimately the same word etymologically in both cases (*recover* "to get back", *re-cover* "to cover again"; *recreation* "diversion", *re-creation* "a creating again").

2.2 Suffix-containing compounds. Suffixes are close-styled (*shoeless, meanness, freer*), except that a succession of three identical consonants is hyphenated (*hull-less*) if one is not dropped (*hullless*).

2.2.1 Some independent English words (*like, worthy*) which are sometimes regarded as suffixes when they are joined to the word they govern may be joined by a hyphen: *Christlike/Christ-like, praiseworthy/praise-worthy*.

2.2.2 When a suffix is added to two or more words that are written separate before suffixation, the styling of these words varies (*baby farming/baby-farming, bitter-ender/bitter ender, otherworldly/other-worldly*). The composition of some of these compounds, especially those that end in *-er*, may be ambiguous. Thus *lime-juicer* "a British ship" is *lime juice + -er*; whereas *lime juicer* "a device for squeezing or juicing limes" is *lime + juicer*. Both words might appear in any of three stylings — hyphenated, open, or solid.

2.3.1 Other real or apparent compounds of this category. In other compounds in which one element is also an independent English word and the other is not or seems not to be, some are usually solid (*raspberry, bonfire, bookmobile, cheeseburger*), others are usually spaced (*tonka bean, shea tree*).

2.3.2 In some words that appear to be similar compounds the apparent independent English word is an assimilation to an English word (*crayfish, gillyflower, gridiron, andiron*). The solid styling is usual for such apparent compounds.

3.1 Noun + noun, as in *fruit + cake, cherry + pie, ox + bow, shoulder + blade, car + load, calamity + howler, emancipation + proclamation*.

3.1.1 In most noun-plus-noun compounds the first noun is uninflected and singular. Some of these compounds are freely styled in all three ways (*prize fighter/prizefighter/prize-fighter*). Some are rarely seen, at least in American English, other than solid (*newspaper, typewriter, pineapple*). Some are usually open (*gunnery sergeant, secretary bird*). Since there is a long precedent for the purely uniting function of the hyphen, it is not out of place in almost any noun-plus-noun compound where both elements are lowercase (*ox-bow, power-transmission, security*

regulations), but it seems to be used less often today than it formerly was. The compounds in which it is most likely to be used are those that would be written solid except that they contain at the point of juncture letters in a sequence unusual within an English word so that apprehension of this point may be retarded. Thus the hyphen is often not so much a uniter of words as it is a separator of letters.

3.1.2 Typically, two-noun noun compounds that are often or usually solid are fairly short, are of frequent occurrence, are concrete rather than abstract, and have primary stress on the first element and secondary stress on the second element (*notebook, paperweight, grasshopper, battlewagon, newspaperman*). Five-syllable solid compounds are comparatively rare. Compounds that sometimes have even stress usually solidify only if short and very common (*corn + meal, air + mail, life + blood, arm + chair, eye + tooth, pot + luck, bed + rock, jaw + bone, barb + wire, car + load, bow + knot, death + bed, bell + wether*).

3.1.3 Falling accentuation (primary stress on first element and secondary stress on second element) is almost a prerequisite to solidification. Observation of how compounds in the spoken language are stressed provides information of possibly more value than an examination of how compounds in the written language are styled. A large proportion of the compounds that are written solid may with equal acceptability be open or hyphenated (*matchbox / match box/match-box*); but in the spoken language falling stress may be acceptable whereas even stress may not be, except when one is making a contrast between one compound and another with the same first element (*matchbox, matchstick*); in such contrasts supersession of the "normal" stress is regular. But the accentuation of compounds, like the accentuation of noncompound phrases, is a matter of usage, which does not fall into neat patterns. In some cases the meaning of a compound is a reliable guide to its accentuation, in other cases not. The native speaker knows that if *wood + box* means "a box made of wood" the stress is $\backslash \text{ }^{\text{e}} \text{ } \backslash$ and that if it means "a box in which wood is placed" the stress is $\backslash \text{ }^{\text{e}} \text{ } \backslash \text{ }^{\text{e}} \text{ } \backslash$. On the other hand he may be unable to be sure of the stress of another compound even after reading a definition of it. Some speakers stress a compound one way, and other speakers another way. To make rules that would cover the stress of all compounds seems impossible. Certain conditions seem to make for one kind of stress or the other; these conditions leave the stress on many compounds unexplained.

3.1.4 In what follows

A = 1st half of a two-part compound

B = 2d half of a two-part compound

C = 3d part of a three-part compound

The relative specificity of B seems to account for many variations in stress between compounds whose elements stand in the same logical relationship to each other: the more specific, the less general and inclusive B is, the more likely the compound is to have even stress; thus *'town + 'hall* but (in the same sense) *'town + 'house: hall* is a more specific term than *house*, whose wide applicability is shown by the combinations or phrases *doll + house, chicken + house, discount + house, mail + order + house, the houses of Congress or Parliament, the house of Rothschild*. Other examples: *'finger + 'nail* (some-

times) but 'finger + ,tip, 'alligator + 'pear but 'alligator + ,weed, 'timothy + ,grass but 'timothy + 'hay, 'church + ,service but 'church + 'liturgy, 'corner + 'store but 'corner + ,stone, 'key + 'signature but 'key + ,note, 'desk + 'drawer but 'desk + ,leg.

3.1.5 Compounds that name something which requires the synchronous association or combination of what is named by A and what is named by B are usually even-stressed: 'leather + 'shoe but 'shoe + ,leather (*shoe + leather* can exist even though it may never be made into a shoe, or has ceased to exist in the form of a shoe), 'bottle + 'beer but 'beer + ,bottle, 'paper + 'book but 'book + ,paper, 'beef + 'soup and 'beef + 'stew but 'beef + ,broth (the last is merely a product of beef flesh, which is not present in the broth as it is in the soup and stew). Among the most numerous members of this category are compounds in which A names a thing of a sort that is the sole or an essential ingredient of B: 'cherry + 'pie (cherries or something of the sort — berries, apples, apricots, peaches — are a necessary part of a pie), 'gold + 'cup, 'glass + 'pendant, 'kid + 'gloves, 'rye + 'bread. When A is a thing of a sort that is secondary or incidental to B, falling stress is more likely: 'fruit + ,cake, 'raisin + ,bread (cake and bread can be quite plain, without anything of the order of raisins or other fruit). Compounds of the first category mentioned in this paragraph may have falling stress if B is lacking in specificity: 'glass + ,ware, 'paper + ,goods.

3.1.6 When A and B stand in an appositive relationship to each other, the stress is usually even: 'baby + 'boy, 'woman + 'driver. *Boy + friend*, however, has falling stress. It differs from the first two compounds in not being literal when it does not mean any friend who is a boy.

3.1.7 Metonymic compounds (compounds that name an entire thing by naming some feature of the thing, the first element sometimes being metaphorical) invariably have falling stress. They rarely have open styling. If they are not long and if there is no troublesome series of letters at the juncture, they are commonly solid: *sheath + bill, frog + mouth, paper + back, egg + head, leather + neck, butter + fingers*; otherwise they are usually hyphenated: *violet + ear*.

3.1.8 There is a numerous class of words in which the second element is a verb plus *-er* or *-ing* and in the definition of which the first element is the object of the verb or the object of a preposition following the verb: *orange + sucker, potato + digger, baby + sitter*. These nearly always have falling accent, and appear quite freely in all three possible stylings. The hyphen is more often used in this class than it is in most other classes.

3.1.9 The relationship of the three elements in the preceding class of compounds can be represented thus: (A) (B, suffix). There is another class of compounds in which two elements are followed by a suffix (one of which may be *-er*, as in the preceding class) but in which the relationship of the three elements is different. Such compounds are *broad jumper* and *Bay Stater* in which the relationship is (A,B) (suffix), not (A) (B, suffix). Another such compound is *gold + medal + -ist*. Such compounds follow the accentuation of the two-part compound to which the suffix is added: 'broad + jump (er), 'Bay + ,State (r), 'gold + 'medal (ist). Such compounds

exhibit all three stylings. In noun compounds of the class (A,B) (suffix), both of the first two elements need not be nouns: *bitter + end + -er, America + first + -er*.

3.2 Noun + (')s + noun, as in *fool(')s + cap, cock(')s + comb, woman(')s + club, women(')s + club*, or **noun + s(') + noun**, as in *boys(') + club, ladies(') + room*.

3.2.1 When these have a literal meaning, they are often written open, and with an apostrophe before the *s* if the first element is in the singular (*red as a cock's comb, a man's house is his castle*) or in the plural but not ending in *s* (*children's clothes*). A few literal compounds of this class, however, are solid and without apostrophe, especially by assimilation to a form that is usual or frequent for an extended sense; thus *cockscumb* occurs for both the comb of a cock and a garden plant; *menswear* and *womenswear* occur usually. If the elements are written solid the apostrophe is not used, whether the first element is singular or plural (*foolscap/never fool'scap, menswear/probably never men'swear*). If the first element is singular and the elements are spaced, the apostrophe is not omitted: *a fool's cap, a man's thoughts, a woman's thoughts*.

3.2.2 When the compound is literal in meaning and open, and the first element is a plural ending in *-s* or is the possessive of a collective singular, the apostrophe is often omitted in titles in which the first element means "for the use of" or "operated by": *farmers(') cooperative, a students(') dictionary, People(')s Industrial Bank, Ladies(') Aid Society*. When the first element is the possessive of a plural that does not end in *-s*, omission of the apostrophe seems to be less frequent: *women's club/womens club*.

3.2.3 The first element may in some cases be either singular or plural: *woman's club/women's club/womens club*.

3.2.4 Compounds in which the first element has a possessive *s* are very common in an extended or figurative sense, especially in plant names. Use of the apostrophe seems to be usual for such compounds and the hyphen is sometimes used. There is often variation between a singular and a plural first element: *baby's breath/babies' breath, ladies' man/lady's man*. The solid form without apostrophe also occurs: *cockscumb, foolscap, swansdown*.

3.3 Adjective + noun, as in *blue + bird, black + tern, red + head, blue + blood*.

3.3.1 When an adjective and an immediately following noun are used with full literalness of meaning and nonattributively, the two are written with a space between and are spoken with level stress: *I saw a 'blue 'bird* (a bird that was blue; variety unknown), *a doll with a 'red 'head*. But when there is some abridgment of full literalness, the adjective and the noun may be written solid or hyphenated and be spoken with falling stress: *I saw one jay and two 'blue,birds* (two 'blue 'birds of the variety known to scientists as *Sialia sialis*; the jay is also a 'blue 'bird); *redheads are proverbially hot-tempered*. Here again, however, as in the case of noun + noun compounds, specificity is important: the more specific the second element of the compound, the more likely the compound is to be written spaced and pronounced with even stress. Thus a typical dictionary definition of *blue + bird* begins "any

of several birds more or less blue above", and a typical definition of *black + tern* begins "any of several small terns with black plumage"; but the first is usually *'blue, bird*, the second is usually *'black + tern*.

3.3.2 Metonyms with an adjective as the first element, like those with a noun as the first element, have falling stress and are usually solid or hyphenated: *'red + ,head*, *'free + ,stone*, *'blue + ,stocking*.

3.3.3 Adjective + noun pairs in which the application of the adjective to the noun is not a literal one commonly have falling stress and may be hyphenated or solid; but the solid styling is less frequent than for specifying compounds like *black + bird*: *cold + chisel*, *easy + chair*.

3.3.4 A few literal even-stressed adjective + noun compounds are styled in any of the three possible ways: *good + will*, *long + suffering*, *loving + kindness*.

3.4 Verb + noun, as in (a) *kill + joy*, *pick + pocket*, *cure + all*, *turn + coat*, *skin + flint*, *sting + shot*, *tattle + tale*, and (b) as in *bake + shop*, *turn + table*, *drip + coffee*, *try + square*.

3.4.1 In the (a) class the second element is the direct object of the verb. Words of this class have falling stress and are not open-styled. They are usually solid if short and if there are no troublesome letter combinations, like *e + a* in *cure + all*, which makes a hyphen usual.

3.4.2 In the compounds in class (b) the second element is not the direct object of the first element. It is impossible to be sure whether the first element of many compounds of this class is to be regarded as a verb or a noun. No practical difficulty arises from this because the styling and stress of these compounds parallels that of noun + noun compounds: all three stylings occur, and the stress is falling in some cases, level in others.

3.5 Particle + noun, as in *down + pour*, *down + draft*, *down + card*, *out + come*, *out + house*, *on + rush*, *on + going*, *on + position*.

3.5.1 A particle, as used here, is one of a small class of words that have sometimes adverbial, sometimes adjectival, sometimes prepositional force. When a verbal idea is present in the noun that is the second element, as it commonly is when the second element is identical in spelling with a corresponding verb, or when the second element ends in *-ing*, such compounds are rarely open, and the solid styling is more frequent than the hyphenated: *down + pour*, *on + going*. When the second element is a concrete noun without any verbal idea and the first element has adjectival force, all three stylings may occur: *down + card*, *down + pipe*, *off + horse*, *out + garrison*, *through + street*, *up + train*.

3.6 Noun + adjective, as in *battle + royal*, *court + martial*, *cousin + german*, *letters + patent*, *postmaster + general*, *sum + total*. These occur both hyphenated and spaced.

3.7 Verb or verb derivative + adverb, as in *write + up*, *lean + to*, *pin + up*, *cut + up*, *shoo + in*, *follow + through*, *grown + up*, *get + together*, *shut + in*, *dampening + off*, *goings + on*, *passer + by*, *hanger + on*.

3.7.1 Both the solid and the hyphenated stylings

are common for such of these nouns as do not have a first element ending in the suffix *-ing* or *-er*. The hyphen prevails when both junctural letters are vowels, as in *write + up*, *shoo + in*. For compounds whose first element ends in the suffix *-ing*, both the hyphenated and the open styling are common. For compounds whose first element ends in the suffix *-er*, the hyphenated or solid styling is usual, the open styling occasional.

4.1 Verb compounds. A verb and an adverb that accompanies and follows it usually have a space between them: *to throw out a ball*, *to throw a ball out*, *to talk loudly*. An adverb preceding a verb usually has a space following: *he loudly demanded reform*, *I well remember the day*, *he soon returned*; but the words considered as particles (in 3.5.) are usually not followed by a space but are close-styled, less often hyphenated: *to uproot/less often up-root an evil*.

4.2 When a solid or hyphenated noun compound is used as a verb by functional change, the styling of the noun compound is generally retained. Thus one who uses the solid or hyphenated styling for the nouns *snow + shoe*, *sand + bag*, *court + martial* will probably use the same styling in *to snow + shoe across a field*, *to sand + bag a dike*, *to court + martial a soldier*.

4.3 For compound verbs that do not belong to any of the categories enumerated in the preceding paragraphs all three stylings are found. The hyphenated styling is the most frequent; the open styling seems to be less common in formal than in informal English. Examples: *to double + space a manuscript*, *to heat + treat a metal*, *to cold + roll steel*.

4.4 A verb compound that has a verb as its second element and that has the suffix *-ing* at the end of the verb may be hyphenated when an object follows but either hyphenated or spaced when no object follows. Thus the same writer may write *heat-treating these metals is not recommended* but *for these metals, heat treating is not recommended*. In the latter, *heat + treatment*, whose usual styling is probably open, could be substituted.

5.1 Compound adverbs of the type illustrated by *to run hot + foot to the window*, *to go bare + foot*, *recommended sight + unseen*, *to win hands + down*, *to dive in head + first* are infrequently found, and at least two stylings can be found for all of these and for some, three. Combinations of adjective + noun are likely to be solid (*hot-foot*), but if the first element is a plural noun or the second a past participle, the form is likely to be open (*arms akimbo*, *feet first*, *sight unseen*).

5.2 Compound adverbs like *light + hearted + -ly* usually follow the styling of the corresponding compound adjective. See 6.5.

5.3 Some compounds with adverbial force consist of a preposition followed by a noun, with loss of the commonly preceding article: *down + town*, *up + stream*, *below + stairs*, *between + decks*, *over + board*. Although each of the three stylings occurs, the solid is probably usual for most.

6.1 Noun or adjective + adjective or participle, as in *snow + white*, *red + hot*, *rusty + red*, *bitter + sweet*, *acid + smelling*, *smoke + filled*. These are usually hyphenated, occasionally solid

(when the compound is short and common), or less frequently open (more often in predicative than in attributive position).

6.2 Adverb + adjective or participle, as in *well + known, better + known, widely + acclaimed, very + ignorant, twice + told*. The solid styling sometimes occurs for these compounds when the first element is a word freely usable as an adverb (*straight + forward, plain + spoken*). Most adverb + adjective compounds are either hyphenated or open. In attributive position an adverb + adjective compound is most likely to be open if the first element is an adverb ending in *-ly* (*an extremely + important matter*); is most likely to be hyphenated if the first element is an adverb that is identical in spelling with an adjective: *a slow + moving van*. Here a hyphen between *slow* and *moving* tells the reader that the writer has in mind a van of no particular variety that is moving slowly; a space between *slow* and *moving* would leave the expression open to the interpretation that the van is a variety known as a moving van and that it is slow; if the latter were the writer's intent, he might very well make it clear by inserting a hyphen between *moving* and *van*, even though he might use the open styling in the *moving + van* has arrived. In predicative position, open styling is more frequent than in attributive position; it is the most frequent styling by far when the first element has only adverbial use (*his hair is now + gray, he was once + wealthy*); it is less frequent when the first element is a form that is used as both adverb and adjective (*the van was large and slow + moving, he is plain + spoken*).

6.3 Participle + participle, as in *out + spoken, up + swept, out + bound*. These are solid or, less often, hyphenated, whether attributive or predicative.

6.4 Noun or adjective + noun, as in *seed + case integument, stove + pipe hat, grandfather + clock collector, short + term loan, small + store owner*. Pairs that are consistently solid or hyphenated in nonattributive position are usually so in attributive position: *the seedcase/seed-case is tough, the seedcase/seed-case integument, twenty blackbirds, a blackbird hater*. Sometimes a writer who uses the spaced styling nonattributively uses the solid styling attributively: *cut with a jig saw; a jigsaw puzzle*. Ordinarily, however, noun pairs that are open-styled nonattributively are either hyphenated or open attributively; the open styling is more common in informal than formal English. Noun + noun + noun groups are probably less often ambiguous than adjective + noun + noun groups and accordingly are probably less often written with a space between A and B. Thus *feed + store owner* presents little or no ambiguity, whereas *small + store owner* written with a space between *small* and *store* is apprehensible, if the context affords no help, either as "owner

of a small store" or "store owner who is small". If the first is the meaning intended, many would insert a hyphen between *small* and *store*; if the second many would insert a hyphen between *store* and *owner*.

6.5 Adjective or noun + noun + -ed, as in *red + head + -ed, club + foot + -ed, hot + temper + -ed, cloud + cap + -ped*. In these the middle element and the suffix are always solid. The first and middle elements are seldom spaced, whether in predicative or attributive position; are usually hyphenated; are solid in a few short compounds of frequent occurrence.

6.6 Adjective or participle + participle, as in *to be hard + up, to be done + in, to be fed + up, warmed + over cabbage, a turned + down collar*. These are usually spaced in predicative position, hyphenated in attributive position. When a prefix is added, the prefix and the middle element are usually written solid; the middle element and the participle are either spaced or hyphenated in predicative position, hyphenated in attributive position: *an un + heard + of accomplishment, such appliances were un + dreamed + of in those days*.

6.7 Preposition—initial adjective compounds, as in *down + stream, up + hill, over + seas, out + of + date, on + the + house, down + in + the + mouth*. Two-part compounds with no article between are usually solid, less often hyphenated or open, in attributive position; in predicative position both solid and open stylings are common: *an up + hill pull, over + seas possessions, the race will be down + stream*. Compounds having three or more parts are open or hyphenated in predicative position, usually hyphenated in attributive position: *book is out + of + date, an out + of + date book, looked down + in + the + mouth*.

6.8 When something in the typography makes the interrelationship of a multiple-word adjective obvious, the hyphen is usually omitted:

A Jim Crow law (capital letters)
an *a priori* argument (italics)
his "big shot" talk (quotation marks)

In an expression like *April + fool joke, Indian + club enthusiast*, where the typography of one member of the attributive (*April*) does not parallel that of the other (*fool*), the hyphen is frequently or usually present (*April-fool joke*).

6.9 Compound adjectives not covered by any of the categories enumerated above are usually hyphenated: *a pop + up toaster, a middle + of + the + road course, his never + the + twain + shall + meet policy*. The solid styling is probably found occasionally for some of the shorter compounds as *pop + up*. The open styling is more common in informal than formal English: *a middle of the road course*.

CAPITALIZATION

1. The essential distinction in the use of capitals and lowercase letters beginning words lies in the particularizing or individualizing significance of capitals as against the generic or generalizing significance of lowercase. A capital is used with proper nouns, that is, nouns that distinguish some individual person, place, or thing from others of the same class, and with proper adjectives, that is, adjectives that take their descriptive meaning from what is characteristic of the person, place, or thing named by the noun. Most proper nouns and proper adjectives used not in the primary signification but in a derived, secondary, or special sense (as *cashmere*, the fabric; *quixotism*, *herculean*) are written usually without capitalization.

2. A capital letter in normal practice in continuous textual matter:

2.1 begins the first word of a sentence or an expression standing for a sentence (You urge in vain.) (Recant my views?) (Never!)

2.2 usually begins a direct formal quotation (God said, Let there be light —Gen 1:3)

2.3 usually begins a direct question within a sentence even though not quoted (The eighteenth century asked of any action, Is it de-
cent?)

2.4 often and traditionally begins a line of verse:
Our fears in Banquo
Stick deep; and in his royalty of nature
Reigns that which would be fear'd —Shak.

2.5 usually begins proper nouns, words used as proper nouns, and their derivatives used in the primary sense (George → Georgian) (Spain → Spanish) (Americanism) (New-Yorky) (Roman customs) but verbs are less often capitalized than adjectives or nouns (anglicize)

2.6 represents the first person pronoun (he and I disagree)

2.7 usually begins the names of peoples, races, tribes, and languages (Phoenician) (Japanese) (Iroquois) (Indo-European) (Latin)

2.8 begins titles of honor, academic and religious titles, and professional and business titles used before proper nouns and epithets used in place of proper nouns (Queen Elizabeth I) (His Eminence the Cardinal Archbishop of New York) (Iron Chancellor) (Citizen King) (Old Hickory) (the Hoosier Poet) (All-America team) (Associate Professor John Doe) (Chief Engineer John Doe) (Treasurer John Doe) but not usually when used after (Henry VIII, king of England) (King George V, emperor of India)

2.9 begins official and government titles and titles of nobility (as *president*, *governor*, *senator*, *speaker of the House*, *secretary for defense*, *postmaster general*, *prime minister*) when preceding a proper name or used in direct address; as (U.S. Minister John Doe) (Secretary John Doe) (His Honor the Mayor) (Mr. President) (Your Honor) but (John Adams, president of the U.S.)

2.10 begins official names of national or international governmental bodies or documents and sometimes short forms of these used specifically

or with a capitalized name but not usually any short forms or modified forms of them in general reference (The Constitution of the United States) (the Eightieth Congress) (the Federal Reserve system) (Federal Reserve banks) (the Federal Communications Commission) (Charter of the United Nations (or the Charter)) (the Security Council (or the Council)) (the International Bank) but (according to the constitution) (administration policies) (federal agency)

2.11 usually begins nouns and often also adjectives that refer to the Deity and pronouns and pronominal adjectives referring to the Deity when not closely preceding or following their antecedent naming Deity (God) (the Supreme Being) (the Almighty) (Allah) (Great Manito) (Providence) (Lord) (the Trinity) (Holy Ghost) (trust Him who doeth all things well; take time to think about God and his beneficence) (The Almighty has his own purposes —Abraham Lincoln) (so lonely 'twas, that God himself scarce seemed there to be —S.T.Coleridge) (Lamb of God, who takest away the sins of the world, only in thy grace shall my soul be healed —Katherine Anne Porter)

2.11.1 Some writers and a few hymnals capitalize a pronoun or pronominal adjective referring to Deity, even when close to the antecedent naming Deity and thus not requiring a capital for clarity of reference (a personal God, creator and governor of all, Who will bring His children into fellowship with Himself) (Jesus and His disciples) ("My Jesu, as Thou wilt") (teach me, my God and King, in all things Thee to see —George Herbert) (God's in His heaven — all's right with the world —Robert Browning) (all Thy works, O Lord, shall bless Thee —Oxford Amer. Hymnal)

2.12 usually begins names for the Bible or parts, versions, or editions of it and names of other sacred books and often derivative adjectives when the adjective refers explicitly to the Bible or Scriptures (otherwise not capitalized) (Bible) (Vedas) (the Scriptures) (Old Testament) (Pentateuch) (Apocrypha) (Gospel of Mark) (Apocalypse)

2.13 begins names of creeds and confessions, religious denominations, monastic orders, and *Church* when used to designate a specific body or edifice (Apostles' Creed) (the Thirty-nine Articles of the Church of England) (Hunt Memorial Church)

2.14 usually begins holidays and holy days generally, the months of the year, and the days of the week (Fourth of July) (Good Friday) (Holy Week) (Labor Day) (January) (next Tuesday)

2.15 begins names of congresses, councils, and expositions, of organizations and institutions, of governmental departments, and of political parties (but not the word *party*) (the Yalta Conference) (the Security Council of the United Nations) (Louisiana Purchase Exposition) (the Progressive party) (the Smithsonian Institution) (Bureau of Engraving and Printing) (Congress of Industrial Organizations)

2.16 begins names of specific courts of law (Circuit Court of the United States for the 2d

Circuit (*but* the circuit court) <the Michigan Court of Appeals (*but* the state court of appeals)>

2.17 begins names of treaties, laws, acts, important events, historical epochs, literary periods, wars <Versailles Treaty> <the Crusades> <Middle Ages> <the Enlightenment> <the Civil War> <War of 1812>

2.18 usually begins names of geological eras, periods, epochs, strata, and names of prehistoric divisions <Carboniferous> <Upper Jurassic> <Age of Reptiles> <Neolithic age>

2.19 begins names of genera but not of species in binomial scientific names in zoology and botany <a marine worm (*Nereis diversicolor*)> <*Spiraea latifolia*>

2.20 begins New Latin names of classes, families, and all other groups above genera in zoology and botany but not derivative adjectives or nouns <Gastropoda *but* gastropod> <Thallophyta *but* thallophyte>

2.21 usually begins a breed name <Belgian hare> <Airedale terrier> <Guernsey bull>

2.22 begins names of planets, constellations, asteroids, stars, and groups of stars but not sun, earth, and moon unless listed with other astronomical names <Mercury> <the planet Venus> <Pleiades> <Big Dipper>

2.23 usually begins generic geographical terms that form an integral part of a specific proper name (as *bay, borough, colony, continent, county, district, hemisphere, island, lake, mountain, pass, and likewise avenue, boulevard, bridge, park, road, square, street*) <Hudson Bay> <Grand Canyon> <Niagara Falls> <Long Island> <Crater Lake> <Blue Ridge> <Park Drive> but <the Atlantic coast of Labrador> <Pacific Islands> <Swiss mountains> <the Ohio river valley> <Indian ocean> <Florida keys> <Sahara desert> <born in Chekiang province> <on the Ohio river> <Oak avenue> <the Leeward and Windward Islands> <at the confluence of the Missouri and Platte rivers>

2.24 usually begins generic political terms that form an integral part of a specific proper name, denoting a political division (as *colony, department, dominion, empire, kingdom, republic, state, territory*) <the Holy Roman Empire> <the Province of Quebec> <the State of Ohio> <the Third Republic>

2.25 usually begins names of definite geographical divisions <the Orient> <the Old World> <the Middle East> <the Middle West>

2.26 usually begins points of the compass used to designate geographical portions of a country or divisions of the world and also nouns or adjectives derived therefrom <the South> <the Northwest> <a Northerner> but not when used to denote direction only <due east> <go west>

2.27 usually begins abstract ideas or inanimate objects personified and names of seasons only when personified or sometimes when referred to specifically or with special connotations <do the bidding of Nature> <the Winter at Valley Forge> <the Plague Year of 1665> <where Spring her verdant mantle cast>

2.28 usually begins all words in titles of books, periodicals, essays, poems except unemphatic prepositions, conjunctions and articles <Shakespeare's *Taming of the Shrew*> <the *Journal of the American Medical Association*> <"Phosphorus: Bearer of Light and Life," *Scientific American* 178:101 ff.> and except in cataloging and often in bibliographies when only the first word and proper names are capitalized.

2.29 usually begins the article *the* when part of a proper name or title or when incorporated as part of the legal name but usually not in referring to newspapers and magazines in running text <The Honorable John Doe> but <the *Chicago Daily News*> <the *Saturday Evening Post*>

2.30 usually begins particles in American names but in foreign names only when not preceded by a forename, a professional title, or a title of nobility or of courtesy <Reginald De Koven> <Della Crusca> <Von Moltke (Count von Moltke)>

2.31 usually begins German common nouns that have not been anglicized, when used in English text <Frau> <Junker> <Luftwaffe> but anglicized German nouns may be written with a small initial letter <blitzkrieg> <gestalt> <leitmotiv> <pumpernickel> <rathskeller> <sauerkraut> <turnverein>

2.32 usually represents academic degrees <A.B.> <LL.D.> <Ph.D.>

2.33 begins names of registered trademarks.

ITALICIZATION

1. Foreign words and phrases that are not fully naturalized are usually italicized in English context. This is done in manuscript or typescript by single underlining. The choice of roman or italic text properly belongs to the user on the basis of subject matter and expected readers. A dictionary cannot prescribe or even record in a matter so subjective. These examples simply show words and phrases that are often italicized in English context <*ancien régime*> <*cognoscente*> <*de trop*> <*dolce far niente*> <*jeu d'esprit*> <*mañana*> <*noblesse oblige*> <*rapprochement*> <*zeitgeist*>

2. Titles of books (not parts of books), plays, works of art, magazines, newspapers are usually italicized but not the Bible or its books <Stevenson's *Treasure Island*> <Verdi's *Il Trovatore*> <Michelangelo's *David*> <the *Christian Science Monitor*> <the *Saturday Evening Post*>

3. Names of ships and aircraft are usually italicized <Lindbergh's *Spirit of St. Louis*> <the carrier *Lexington*>

4. Names of long-range missiles and man-made satellites are often italicized.

5. A word spoken of as a word, a phrase as a phrase, a letter as a letter (except that a letter indicating shape is printed in type most nearly depicting the shape; thus, V-shaped; I beam) are usually italicized.

6. New Latin scientific names of genera, species, subspecies, and varieties (but not groups of higher rank, as phyla, classes, orders) in botanical and zoological names are italicized <a thick-shelled American clam (*Mercenaria mercenaria*)>

COLLEGES AND UNIVERSITIES IN THE UNITED STATES AND CANADA

The first list contains all institutions of higher education in the United States, according to information available at the date of compilation. It includes some (but not all) branches which retain by general recognition their individual names, but no attempt is made to indicate relationship of one institution to another or connection with a state university system. Recurrent institutional designations are abbreviated as follows:

<i>A. & M.</i>	Agricultural and Mechanical	<i>Mech.</i>	Mechanical
<i>Acad.</i>	Academy	<i>Med.</i>	Medical
<i>Agric.</i>	Agriculture	<i>Sch.</i>	School
<i>C.</i>	College	<i>Sem.</i>	Seminary
<i>Ed.</i>	Education	<i>Tech.</i>	Technology
<i>Inst.</i>	Institute	<i>Theol.</i>	Theological
		<i>U.</i>	University

The entry gives pronunciation, location, kind of student body, and date. Pronunciations not given may be found elsewhere in this dictionary. The location is that of the main administrative center or campus only. The state, or sometimes the city, is omitted when it is part of the title and when no uncertainty is likely. The abbreviation *coed.* (for *coeducational*) is used for institutions which regularly admit women to any one of their academic divisions; otherwise *men* or *women* is used. The word *junior*, as used when not a part of the name, indicates a junior college. The date is intended to be the earliest assignable to the institution's establishment; it is not always the year when the current name was adopted.

Similarly, the second list, following, contains Canadian institutions.

WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY UNABRIDGED

From the first word to the last—in contents, size, shape, and design—this is a completely new unabridged dictionary. It presents the English language in a new modern way to give you the most useful, understandable, and enjoyable fund of word information ever available and covering every area of human thought. A masterpiece of modern defining, every definition is given in a single phrase of precise meaning. Thousands of quotations from well-known writers demonstrate word usage to make meanings clearly understandable. 450,000 entries, including 100,000 new words or meanings never before covered in the unabridged Merriam-Webster. 3,000 terms newly illustrated with twenty true-to-life plates in glorious color. Simplified pronunciation key, clear and informative etymologies, 1,000 synonym articles. This is one of the most remarkable literary achievements of all time. 2,720 pages.

WEBSTER'S NEW SECONDARY SCHOOL DICTIONARY

This dictionary has been specifically written for teen-age needs in junior high school and higher grades. 44,000 entries and 800 new illustrations. A special 34-page introduction teaches each student how to use the dictionary. An everyday aid to better understanding and improved grades through everyday use at home.

WEBSTER'S ELEMENTARY DICTIONARY

The only dictionary specifically written for boys and girls in the fourth, fifth, sixth, and seventh grades. 18,000 vocabulary entries selected for elementary-school needs—and to help the child at home. 1,600 pictures to increase understanding and interest. Large, clear, easily readable type with simplified pronunciation. Sturdily bound.

WEBSTER'S DICTIONARY OF SYNONYMS

Shows how to use the right word in the right place, easily and quickly. An especially useful book for students. 944 pages.

WEBSTER'S BIOGRAPHICAL DICTIONARY

Concise information about the lives of more than 40,000 men and women from all countries, every period of history. 1,700 pages.

WEBSTER'S GEOGRAPHICAL DICTIONARY

The greatest fund of geographical information obtainable in a single volume. 40,000 of the world's important places. 1,352 pages.

CAUTION: The Merriam series of Webster's Dictionaries can be identified by a circular trademark on the cover and also by the trademark *A Merriam-Webster* on the title page. Only in this series are to be found the most authoritative dictionaries, based on the experience of more than a century of dictionary making. These trademarks insure accuracy, reliability, and up-to-dateness. To be sure you're right, insist on a Merriam-Webster.
